Submarines Antony Preston,1975 *The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual* Ron Martini,2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can t understand terms like head deck and overhead and who think SOS is a distress signal **Submarine** Tom Clancy,John Gresham,2003-05-06 Only the author of The Hunt for Red October could capture the reality of life aboard a nuclear submarine Only a writer of Mr Clancy s magnitude could obtain security clearance for information diagrams and photographs never before available to the public Now every civilian can enter this top secret world the weapons the procedures the people themselves the startling facts behind the fiction that made Tom Clancy a 1 bestselling author **Secret Fleets** Lynne Cairns,2011-09-01 Contrary to what many Australians believe during 1942 Japanese submarines were active in Australian waters and Japanese spy planes made surveillance flights over our major cities With enemy submarines patrolling off the Western Australian coast Fremantle became an important international submarine base the largest in the Southern Hemisphere During the war Fremantle played host to over 170 Allied submarines with submarines of the United States British and Dutch navies making a total of 416 war patrols out of the port between March 1942 and August 1945 The secrecy surrounding the operation of the Fremantle submarine base meant that its existence was little known at the time and until now has been largely forgotten by history

the USS Housatonic in a daring nighttime operation Less well known however is that the Hunley was not alone under the waters of America during the Civil War Both the Union and Confederacy built a wide and incredible array of vessels that could maneuver underwater and many were put to use patrolling enemy waters In Submarine Warfare in the Civil War Mark Ragan who spent years mining factory records and log books brings this little known history to the surface The hardcover edition Union and Confederate Submarine Warfare in the Civil War was published to wide acclaim in 1999 For this new paperback edition Ragan has revised and updated the text to include the full story of the Hunley s recovery and restoration

Hellions of the Deep Robert Gannon,1996 Ultimately World War II was the first war won by technology but within only a few weeks after the war began the U S Navy realized its torpedo program was a dismal failure Submarine skippers reported that most of their torpedoes were either missing the targets or failing to explode if they did hit The United States had to work fast if it expected to compete with the Japanese Long Lance the biggest and fastest torpedo in the world and Germany s electric and sonar models Hellions of the Deep tells the dramatic story of how Navy planners threw aside the careful procedures of peacetime science and initiated radical research gathering together the nation s best scientists and engineers in huge research centers and giving them freedom of experimentation to create sophisticated weaponry with a single goal winning the war The largest center for torpedo work was a requisitioned gymnasium at Harvard University where the most famous names in science worked with the best graduate students from all around the country at the business of war They had to produce tangible weapons to consider production and supply tactics to take orders from the military and in many cases also to teach the military how to use the weapons they developed World War II grew into a chess match played by scientists and physicists and it became the only war in history to be won by weapons invented during the conflict For this book Robert Gannon conducted numerous interviews over a twenty year period with scientists engineers physicists submarine skippers and Navy bureaucrats all involved in the development of the advanced weapons technology that won the war While the search for new weapons was deadly serious stretching imagination and resourcefulness to the limit each day the need was obvious American ships were being blown up daily just outside the Boston harbor These oral histories reveal that in retrospect surprising even to those who went through it the search for the hellions of the deep was for many the most exciting period of their lives
