Subnational Democracy In The European Union:

Subnational Democracy in the European Union John Loughlin, 2001-04-05 This book is the result of a research project carried out for the Committee of the Regions and analyses the state of play of democratic practice at the subnational level in all of the European Member states Its initial hypothesis was that liberal democracy is closely associated with the rise of the nation state in the 19th century The nation state however has been significantly changing under the impact of various forces including globalization and regionalization internal reforms of the public administration system such as privatization and deregulation and the emergence of regions and local authorities as actors in their own rights these changes pose challenges for the practice of democracy and in particular for its expression at the regional and local level The book deals with the theoretical implications of these changes in terms of the changing nature of the state and new regionalism However one of the key findings is that there is no one uniform meaning of democracy across member states and there are variations even within a single state depending on whether the national or subnational levels are considered Each country chapter gives the historical and philosophical background to the concept of democracy in each country There is also an exposition of the institutional expression of democracy at the different levels With regard to the practice of democracy at the subnational level the role of pressure groups and policy networks is examined as well as the role of political parties There is a survey of critiques of subnational democracy Finally there is a survey of innovative approaches to improving regional and local democracy through a variety of mechanisms and reforms as ways of responding to the challenge and opportunities facing it today

Subnational Democracy in the European Union John Loughlin, Eliseo Aja, 2023 The result of a research project carried out for the Committee of the Regions this work analyses democratic practice at the subnational level in all of the European member states

Subnational Authorities and the European Union Stephan Lutzenberger, 2022-02-21 The European Union as a regulatory polity based on integration through law arguably relies more on legal compliance with its policies than any other political system Proceeding from this point of departure this book puts the spotlight on the subnational tier and scrutinizes its role in ensuring compliance Drawing on a dataset of infringement proceedings against federal and regionalized member states the book shows that strong shared rule i.e strong cooperation between national and subnational authorities can improve national compliance records In contrast policy sectors with strong redistributive consequences impair subnational authorities capacity to comply In short policy and politics matter more than polity

The Role of Regions and Sub-National Actors in Europe Stephen Weatherill, Ulf Bernitz, 2005-06-15 The essays gathered in this collection examine the involvement of self governing sub national and regional actors in the law and policy making of the European Union State power is today exercised in the context of the complex institutional environment of the EU But what of regions and sub national actors Are their interests adequately represented can they advance them or can they at least protect them from unwitting or calculated damage This book surveys the broad questions of law and political science and

investigates the contribution of the EU's Committee of the Regions and also bottom up initiatives launched by the regions themselves. Given that much regional autonomy has been hard won, one would suppose that the centralising influence flowing from the EU's intrusion into the domestic settlement would be treated with extreme caution by the regions. Moreover, among the Member States, there is great diversity in the patterns of political organisation adopted to cope with the tension between the centralisation of power and respect for local autonomy. Case studies including Spain, Germany and Finland reveal that there is no single consistent historical narrative. States change as the UK's recent experience illustrates. The book offers findings that are interesting at a general level in investigating patterns of multi-level governance but is also rich in case specific information.

The Sub-national Dimension of the EU Carlo Panara, 2015-03-02 This book is the first monograph form legal study on multilevel governance in the EU and represents a radical change in the approach to this topic.

Particularly after the Treaty of Lisbon's entry into force, research on multilevel governance can no longer remain confined to the analysis of political dynamics or of soft law arrangements. Multilevel governance emerges as a constitutional principle in the European constitutional space, envisaging a method of governance based on the strong involvement of sub-national authorities in the creation and implementation of EU law and policy. Its foundation is in the mosaic resulting from the constitutional systems of the Union and its Member States. Multilevel governance arrangements play a fundamental part in achieving key Treaty objectives such as subsidiarity, respect for the national identities of the Member States, including regional and local self-government, openness and closeness to the citizen. These arrangements lend legitimacy to EU decision making while also promoting constitutionalism and democracy in the EU.

Regional and Local Democracy in the European Union John Loughlin, Committee of the Regions, 1999

Subnational Authorities in EU Law Michèle Finck, 2017 This book explores the relationship between EU law and the member states' local and regional authorities. Through a survey of various areas of EU law, the book introduces two narratives of local and regional authorities in EU law. These narratives also point towards different conceptions of the European legal order itself.

EU Environmental Policies in Subnational Regions Antje C.K. Brown, 2017-10-05 This title was first published in 2001. Despite the fact that environmental directives are one of the strongest areas of policy decreed by the EU, it has a much poorer record when it comes to actual implementation of these policies. Instead of focusing on the traditional state-centrist accounts, this book compares two subnational regions within the EU: Scotland and Bavaria, and their role in the policy process. The author offers a multi-layered implementation map which highlights three main government layers involved in the filtering process and identifies various formal and informal determinants which shape EU environmental policies during the process. The book not only compares implementation performances between the two regions and their respective states but also compares the region's processes against the national processes, thereby exposing determinants that would otherwise remain undetected. In doing so, it confirms that subnational regions feature determinants which differ in many respects from national determinants and influence the

effectiveness of EU environmental policies The book contributes to a better understanding of the implementation deficit and presents a more refined picture of the EU environmental policy reality

Territory, Identity and Spatial Planning Mark Tewdwr-Jones, Philip Allmendinger, 2006-09-27 This book provides a multi disciplinary study of territory identity and space in a devolved UK through the lens of spatial planning It draws together leading internationally renowned researchers from a variety of disciplines to address the implications of devolution upon spatial planning and the rescaling of UK politics Each contributor offers a different perspective on the core issues in planning today in the context of New Labour s regional project particularly the government s concern with business competitiveness and key themes are illustrated with important case studies throughout

Local Government in the European Union Marius Guderjan, Tom Verhelst, 2021-09-30 This book addresses the bigger picture of local European relations and adds a new dimension to existing studies on multilevel governance and the Europeanisation of local government Drawing from a combination of European integration theories and operational approaches it introduces the idea of an integration cycle in which local government responds to the top down impact of the EU internally horizontally and vertically This volume presents a wide range of empirical examples to demonstrate how local authorities across Europe have changed their practices orientation and preferences and adapted their institutions and organisation Not only do cities towns and counties cooperate with each other across borders and through transnational networks and partnerships but by mobilising formally and informally local actors participate in and influence European governance and contribute to the future trajectories of European integration thereby completing the integration cycle

European Regions, 1870 - 2020 Jordi Martí-Henneberg, 2021-08-20 This volume explains the national and regional border modifications that took place in Europe from 1870 to 2020 It provides insights that allow us to understand boundary changes for several different levels of territorial organization The text describes the state formation process related to the regional administrative structures in each European country and offers insight into the degree of centralization historically by describing the extent of legislative autonomy at different administrative levels and the competences reserved for each of them The book sheds light on the complex regional organization of Europe and the difficulties its reform has faced The main audience will be academics and PhD Masters students working in a variety of geography fields and the maps included in each chapter will also be of interest to a broader audience including undergraduate and secondary school students wishing to better understand the political history of Europe

Beyond the Nation State D. Hanley, 2007-11-09 States are seen as needing to provide responses to these new challenges but parties within those states are equally challenged David Hanley examines how parties address those challenges and the manner in which parties act at supranational level

Inter-Municipal Cooperation in Europe Rudie Hulst, André van Montfort, 2007-05-11 Over the past fifty years local government in Europe has been confronted with escalating scales of production population migration and market pressures These developments have complicated its performance challenged its domain and even threatened its existence A

popular coping strategy is inter municipal cooperation a phenomenon that despite its ubiquity has not been subject to systematic comparative research This book presents an overview of inter municipal cooperation in eight European countries Each country study sketches its attendant forms their institutional design the tasks and competencies attributed to joint authorities of municipalities and the way inter municipal cooperation operates in practice Both performance and democratic aspects of cooperation are recurring topics The last chapter of the book presents a comparative analysis and reflects on the future of inter municipal cooperation
