**Substances and Universals in Aristotle's Metaphysics** Theodore Scaltsas,1994 No detailed description available for Substances and Universals in Aristotle s Metaphysics      [Substances and Universals in Aristotle's Metaphysics](#) Theodore Scaltsas,2010 In this book Theodore Scaltsas brings the insights of contemporary philosophy to bear on a classic problem in metaphysics that stems from Aristotle s theory of substance Scaltsas provides an analysis of the enigmatic notions of potentiality and actuality which he uses to explain Aristotle s substantial holism by showing how the concrete and the abstract parts of a substance form a dynamic diachronic whole      **Substance in Aristotle's Metaphysics Zeta** Norman O. Dahl,2019-08-28 This book argues that according to Metaphysics Zeta substantial forms constitute substantial being in the sensible world and individual composites make up the basic constituents that possess this kind of being The study explains why Aristotle provides a reexamination of substance after the Categories Physics and De Anima and highlights the contribution Z is meant to make to the science of being Norman O Dahl argues that Z 1 11 leaves both substantial forms and individual composites as candidates for basic constituents with Z 12 being something that can be set aside He explains that although the main focus of Z 13 16 is to argue against a Platonic view that takes universals to be basic constituents some of its arguments commit Aristotle to individual composites as basic constituents with Z 17 s taking substantial form to constitute substantial being is compatible with that commitment      **Substance and Predication in Aristotle** Frank A. Lewis,1991 This book takes up the central themes of Aristotle s metaphysical theory and the various transformations they undergo prior to their full expresson in the Metaphysics This book takes up the central themes of Aristotle s metaphysical theory and the various transformations they undergo prior to their full expresson in the Metaphysics      **Aristotle's Metaphysics** Aristóteles,1924      **Aristotle's Metaphysics** Aristotle,1924      [Aristotle's Metaphysics: Books A-E](#) Aristotle,1924      [The Metaphysics of Aristotle](#) Aristotle,1891      **Proceedings of the Boston Area Colloquium in Ancient Philosophy, Volume XV, 1999** John J. Cleary,Gary M. Gurtler,2000-03-31 Most of the colloquia explore important topics such as the notion of self in Plato and the relationship between sense and knowledge in Aristotle In addition two colloquia discuss the origins of Pyrrhonic scepticism and the themes of Seneca s Natural Questions This publication has also been published in paperback please click here for details      **Aristotle's Philosophical Development** William Robert Wians,1996 For most of this century Aristotelian scholarship was dominated by a single question how might Aristotle s intellectual development be used to shed light on his philosophical doctrines Opinions differed widely as to how this growth was to be charted eventually a reaction to the whole enterprise set in and the past thirty years have seen the question lose its prominence Recently certain scholars have reopened the question In this collection of new essays sixteen distinguished scholars reconsider the promise and limitations of developmentalism with contributions devoted to Aristotle s logic and epistemology physics biology and psychology ethics and politics and metaphysics Also included are classic developmental

studies by Anton Hermann Chroust and Thomas Case Contributors Enrico Berti Klaus Brinkmann Thomas Case Anton Hermann Chroust John Cleary Alan Code Russell Dancy Cynthia Freeland Daniel Graham Jaako Hintikka James Lennox Deborah Modrak Pierre Pellegrin John M Rist William Wians and Charlotte Witt     **The Problem of Universals in Contemporary Philosophy** Gabriele Galluzzo, Michael J. Loux, 2015-07-16 Are there any universal entities Or is the world populated only by particular things The problem of universals is one of the most fascinating and enduring topics in the history of metaphysics with roots in ancient and medieval philosophy This collection of new essays provides an innovative overview of the contemporary debate on universals Rather than focusing exclusively on the traditional opposition between realism and nominalism the contributors explore the complexity of the debate and illustrate a broad range of positions within both the realist and the nominalist camps Realism is viewed through the lens of the distinction between constituent and relational ontologies while nominalism is reconstructed in light of the controversy over the notion of trope The result is a fresh picture of contemporary metaphysics in which traditional strategies of dealing with the problem of universals are both reaffirmed and called into question     Primary "Ousia" Michael Loux, 2018-09-05 Michael J Loux here presents a fresh reading of two of the most important books of the Metaphysics Books Z and H in which Aristotle presents his mature theory of primary substances ousiai Focusing on the interplay of Aristotle's early and late views Loux maintains that the later concept of ousia should be understood in terms of a theory of predication that carries interesting implications for contemporary metaphysics Loux argues that in his first attempt in identifying ousiai in the Categories Aristotle encountered a set of ontological problems which he wrestled with again in Metaphysics Z and H In the Categories where the primary realities are basic subjects of predication construed in essentialist terms as things falling under natural kinds familiar particulars are the primary ousiai In subsequent works Aristotle holds that since familiar particulars come into being and pass away they must be composites of matter and form and in Metaphysics Z and H he explores the implications of this insight for the search for ousia Maintaining that the substantial forms of familiar particulars are the primary ousiai the later Aristotle interprets forms as predicable universals rather than as particulars each uniquely possessed by a single object     *A Companion to Aristotle* Georgios Anagnostopoulos, 2013-03-05 The Blackwell Companion to Aristotle provides in depth studies of the main themes of Aristotle's thought from art to zoology The most comprehensive single volume survey of the life and work of Aristotle Comprised of 40 newly commissioned essays from leading experts Covers the full range of Aristotle's work from his theoretical inquiries into metaphysics physics psychology and biology to the practical and productive sciences such as ethics politics rhetoric and art     **The Cambridge Companion to Aristotle** Jonathan Barnes, 1995-01-27 The most accessible and comprehensive guide to Aristotle currently available     The Medieval Reception of Book Zeta of Aristotle's Metaphysics (2 Vol. Set) Gabriele Galluzzo, 2012-11-09 Focusing on the medieval reception of Book Zeta of Aristotle's Metaphysics Volume One of this work offers an unprecedented and philosophically oriented study of medieval ontology

against the background of the current metaphysical debate on the nature of material objects Volume Two makes available to scholars one of the culminating points in the medieval reception of Aristotle's metaphysical thought by presenting the first critical edition of Book VII of Paul of Venice's Commentary on Aristotle's Metaphysics 1420-1424 *The Encyclopædia Britannica* Hugh Chisholm, 1910 **The Encyclopaedia Britannica** Hugh Chisholm, 1910 This eleventh edition was developed during the encyclopaedia's transition from a British to an American publication Some of its articles were written by the best known scholars of the time and it is considered to be a landmark encyclopaedia for scholarship and literary style

**The Encyclopaedia Britannica** Hugh Chisholm, 1911 **Five Texts on the Mediaeval Problem of Universals** Paul V. Spade, 1994-03-15 New translations of the central mediaeval texts on the problem of universals are presented here in an affordable edition suitable for use in courses in mediaeval philosophy history of mediaeval philosophy and universals Includes a concise Introduction glossary of important terms notes and bibliography *The Encyclopædia Britannica*, 1910
