Carpenter,James M. Moser,Thomas A. Romberg,2020-08-15 A hallmark of much of the research on children s thinking in the 1970s had been the focus on explicit content domains Much of this research had been represented by an eclectic collection of studies sampled from a variety of disciplines and content areas However in the few years before this publication research in several content domains has begun to coalesce into a coherent body of knowledge Originally published in 1982 the chapters in this work represent one of the first attempts to bring together the perspectives of a variety of different researchers investigating a specific well defined content domain This book presents theoretical views and research findings of a group of international scholars who are investigating the early acquisition of addition and subtraction skills by young children Together the contributors bring a blend of psychology educational psychology and mathematics

The Sustainable Development Goals SDGs 2016 2030 set by the United Nations in 2015 restated the importance of universal primary education for all and specifically discuss quality equity and inclusion in basic education To achieve this the role of community has been emphasized and participation has become a buzzword in international development over the past several decades Despite the growing attention to community participation in school management previous literature has shown mixed results in terms of its actual practice and its impacts on quality equity and inclusion in education This book deepens the contextual understanding of community in developing countries and its involvement in schools in general and its impact on quality equity and inclusion of school education in particular By presenting various case studies in Asia Africa Latin America and a post conflict state in Europe the book analyses commonalities and differences in the ways communities are involved and cast their impacts and challenges The book contributes knowledge on the ways in which community involvement could work in developing countries the detailed processes and factors that make community participation work in different dimensions and remaining challenges that scholars and practitioners still need to be concerned and mindful in the field This book will appeal to both researchers and practitioners who are concerned about the community participation approach for the SDGs
