Success In Psychology:

Nothing Succeeds like Success Christian D. Larson, 2022-05-30 NOTHING SUCCEEDS LIKE SUCCESS THIS is a statement with which we are all familiar and we all know it to be true but do we know why it is true When we begin to think of this statement really think we find it to be pregnant with facts and possibilities far beyond anything the majority ever imagined and when we understand these facts and possibilities we shall find the real secret to all success The understanding of these things however cannot be gained until we study carefully the psychology of success itself as well as the psychology of the above mentioned statement And we realize beforehand that we shall through such a study find facts that will positively prove invaluable When we think of success we usually think of the accumulation of wealth but this can never be more than a small fragment of success because success in reality signifies any form of attainment or achievement that is truly worthwhile And it is very important that we realize this larger meaning of success before we attempt to comprehend the psychology of success The fact is this that anyone who is advancing in their work is successful to that degree whether their recompense be large or small and no one can be spoken of as successful unless steady advancement is clearly evident It is only the mind that is moving forward or rising in the scale that can succeed because success invariably implies the adding of more and more to what we already possess whether those possessions be tangible possessions achievements and attainments or riches of mind and soul When we understand the full meaning of success we shall find that the reason why nothing succeeds like success is due to the fact that the psychological process of success contains within itself the real power for success and when that power has actually been placed in action it tends invariably to produce greater and greater success **The Psychology of**
