*A Good Face for Radio* Eddie Mair, 2017-11-02 Eddie Mair is by his own account one of Britain's most beloved broadcasters. Born in Dundee, Scotland, he has worked in radio all his adult life. From the foothills of commercial radio in his hometown through the sunlit uplands of the BBC in Scotland, he has reached the peaks of his profession with BBC network radio in London. And he's never afraid to work a metaphor beyond endurance. In addition, he's appeared on most of the BBC's TV channels, including ones that are no longer on TV. He witnessed the handover of Hong Kong and once asked Arnold Schwarzenegger a question though he takes no responsibility for either. For nearly twenty years, he has been at the helm of Radio 4's PM, a nightly news round-up that means Eddie works for just one hour a day, giving him plenty of time to knock together these diaries. Whether he's interviewing politicians, getting people to share their personal experiences, or just imparting his favourite zesty chicken recipes, Eddie is never happier than when he is at the microphone. Except when he is at the microphone with a large martini. In truth, his neediness is an irritation to everyone who knows him, and if you buy this book, he might get out of their hair. Eddie's other work as a humanitarian and tireless secret worker for charity is not mentioned in these pages.

**Forensic Face Matching** Markus Bindemann, 2021-01-07 In everyday life, we identify faces regularly and seemingly with great ease. One might assume this to be a straightforward and highly accurate task. However, we are poor at identifying the faces of unfamiliar people whom we have never met before, despite the fact that many important everyday tasks depend on this. Forensic face matching requires the comparison of two face photographs of a person who is not known to the observer. This seemingly simple task is critical for a wide range of security tasks, such as person identification at airports and borders, passport issuance and renewal, and criminal identification in police investigations. Despite its ubiquity, face matching is highly prone to error, even under conditions that are designed to maximally facilitate this task. For this reason, face matching has been studied extensively in psychology, with the bulk of the research conducted since 2010. Forensic face matching provides readers with a wide-ranging, detailed, and critical overview of facial comparison and face matching, providing insights into its application, efficacy, and limitations in occupational settings and of current scientific knowledge of this task.
