The Sudoku Effect: Universities in the Vicious Circle of Bureaucracy Stefan Kühn, 2014-03-12 This book shows that the introduction of the European Credit Transfer System ECTS of credit points as a new accounting unit at universities has led to increased bureaucracy and the schoolmaster style regimentation of Bachelor's and Master's courses It explains how due to the pressure of having to plan every single working hour of studying in advance a Sudoku Effect is created by the necessity to combine courses exams and modules in such a way that the points add up An unintentional side effect of the introduction of the ECTS the Sudoku Effect has led to more classroom style teaching an inflation of exams and fewer choices available to students It has resulted in such complex and contradictory guidelines for the planning of the

curriculum that the values attributed to the higher education reform can often only be realised if the rules for Bachelor s and Master s programmes are ignored or at least stretched in practice The book describes how the reaction to this situation is the continuous further refinement of the complicated rules rather than their abolishment
