Proceedings of The Academy of Natural Sciences (Vol. CVIL, 1955) , **Disability, Avoidance and the Academy** David Bolt, Claire Penketh, 2017-07-14 Disability is a widespread phenomenon indeed a potentially universal one as life expectancies

rise Within the academic world it has relevance for all disciplines yet is often dismissed as a niche market or someone else's domain This collection explores how academic avoidance of disability studies and disability theory is indicative of social prejudice and highlights conversely how the academy can and does engage with disability studies This innovative book brings together work in the humanities and the social sciences and draws on the riches of cultural diversity to challenge institutional and disciplinary avoidance Divided into three parts the first looks at how educational institutions and systems implicitly uphold double standards which can result in negative experiences for staff and students who are disabled The second part explores how disability studies informs and improves a number of academic disciplines from social work to performance arts The final part shows how more diverse cultural engagement offers a way forward for the academy demonstrating ways in which we can make more explicit the interdisciplinary significance of disability studies and by extension disability theory activism experience and culture Disability Avoidance and the Academy Challenging Resistance will interest students and scholars of disability studies education studies and cultural studies

Nelson,Heather J. Shotton,2022-08-19 Indigenous Motherhood in the Academy highlights the experiences and narratives emerging from Indigenous mothers in the academy who are negotiating their roles in multiple contexts The essays in this volume contribute to the broader higher education literature and the literature on Indigenous representation in the academy filling a longtime gap that has excluded Indigenous women scholar voices This book covers diverse topics such as the journey to motherhood lessons through motherhood acknowledging ancestors and grandparents in one's mothering how historical trauma and violence plague the past and balancing mothering through the healing process More specific to Indigenous motherhood in the academy is how culture and place impacts mothering specifically if Indigenous mothers are not in their traditional homelands as they raise their children how academia impacts mothering how mothering impacts scholarship and how to negotiate loss and other complexities between motherhood and one's role in the academy

What The Academy Taught Us: Improving Schools from the Bottom Up in a Top-Down Transformation Era Eric Kalenze,2019-08-23 Early in the 2000s a high school principal in Minnesota Dr Bob Perdaems faced a complex challenge The demographics of his school were shifting political tensions in the surrounding communities were rising and thanks to the No Child Left Behind Act's new testing and accountability requirements his school's performance was soon to be scrutinized more intensely and more publicly than ever before While he had several visions of how his school could continuously improve through these realities however he had no additional budget to bring his ideas to life Undaunted Dr Bob set to creating school improvements the best way he knew how and that of course he could afford he prioritized his school's areas for growth found teachers who would lend minds and hands and gathered them to look at the blueprints What the Academy Taught Us is a book about the collaborative school improvement culture Dr Bob created in his Minnesota high

school the principles that initiated it the collective effort that kept it running and the lasting effects it had on its teachers and students The book also brilliantly explores how bottom up approaches like Dr Bob s fare in the current era which seeks to transform schools through more top down and disruptive means Ultimately What the Academy Taught Us offers today s educators a way forward While largely viewing the difficult work of school improvement through the prism of a single school it presents abundant recommendations about how schools everywhere can build effective and continuous improvement from the bottom up
