The Aging Experience

Russell A. Ward

The Aging Experience:

The Aging Experience Jennie Keith, Christine L. Fry, Anthony P. Glascock, Charlotte Ikels, Jeanette Dickerson-Putman, Henry C. Harpending, Patricia Draper, 1994-09-22 In an attempt to understand the meaning of ageing and the treatment of the aged in different cultures seven anthropologists have made studies of 10 communities on four continents the results of which are presented in this book The authors use both qualitative and statistical data to examine such issues as health and well being perceptions of the life course material resources and functionality of elders A unique resource The Aging Experience provides a detailed comparative analysis of ageing worldwide **The Aging Experience** Russell A. Ward, 1979 [The Aging Experience](#) Cherry Russell, 2024-05-10 Local writing on the subject of old age had tended to a fairly uniform approach focusing on empirical studies of old age as a social problem using census and survey type data Little attention had been paid to theory development Originally published in 1981 this book provides an in depth study of how old age was experienced in contemporary Australian society at the time It was the first major piece of original research on aging to be published in Australia and in several important senses represented a clear departure from the mainstream of Australian gerontology The Aging Experience links original in depth data to a broad theoretical framework Working from the premise that old age is a devalued status it examines the implications of this for the personal experience and interpersonal relations of elderly people Through detailed case studies of elderly Australians their interaction with family age peers and welfare services are described The analysis concentrates less on the overt characteristics of these relationships and their material functions than on their symbolic content and meaning for the participants Thus the study moves beyond conventional statistical documentation of the problems of old age to a sharper delineation of aging as a lived experience It is an approach which offers new perspectives and challenges many of the assumptions underlying previous research **The Aging Experience** Bert Cave, 2012-07-01 The Aging Experience is the phase of our life that tends to get the least attention in terms of planning and forethought We research and plan where we will go to college where we will live our career opportunities our retirement Even our estates are planned through wills trusts and advance health care directives What we do not usually plan very well or even understand fully is the aging experience we will encounter **Worlds of Difference** Eleanor Palo Stoller, Rose Campbell Gibson, 2000 This collection of readings presents a variety of perspectives on ageing from different communities across the United States Native American Puerto Rican African American the elderly homeless white working class gay and Mexican amongst many others The readings cover topics such as life course social and psychological contexts of ageing paid and unpaid activity the American family and health *Pathways to the Development of the Aging Phenotype* John Papaconstantinou, 2025-08-13 Pathways to the Development of the Aging Phenotype explores the journey that all living things must eventually take Using the definition that aging is a multifactorial syndrome caused by multiple pathophysiological processes that occur simultaneously in multiple tissues of the aged Dr John Papaconstantinou provides a

wholistic look at aging its causes how it presents and how aging syndromes can be treated In addition this book offers a deeper look at the effects of aging on individual organs The aging heart skeletal muscle eye skin kidney intestine liver pancreas and adipose tissue are all covered as well as an examination of the aging brain and neurodegenerative diseases such as Alzheimer s ALS Parkinson s and Huntington s disease Other important subjects covered are the effects of social isolation and loneliness on aging as well as the effects of sleep and other lifestyle choices Throughout the book Dr Papaconstantinou provides information on current and promising research on aging and the treatment of aging syndromes as well as the recent exciting work on tissue regeneration that suggests aged tissues and organs can be reprogrammed to a juvenile phenotype Pathways to the Development of the Aging Phenotype is an exciting addition to scientific and medical literature related to aging and will be an invaluable resource for medical students professionals and researchers looking to expand their knowledge in this field
