the book provides a vast amount of information on fire manipulation and prevention in urban life Hazen and Hazen discuss the people who worked with fire or against it Founders gaffers blacksmiths boilers at saltworks and housewives knew how to read a fire and employ it for their purposes A few dedicated investigators inquired about the scientific nature of heat and flame And firefighters gradually progressed from bucket brigades to using fire to fight fire with the newly invented steam engine The colorful stories of these Americans the risks they took and the rewards they received will fascinate not only social historians but also a broad audience of general readers Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Literacy in the Library Mark Dressman,1997-12-09 This critical ethnography of school libraries contributes to the study of the politics of literacy at the elementary school level as well as provides an interesting case study of border crossing The book interrogates two accounts of social reproduction and proposes a third Students at working poor Chavez Elementary resisted attempts to get them hooked on reading fiction but while many were socialized to the labor of a piecework economy many also found ways to use texts as they chose At professional managerial Crest Hills students managed their discourse practices in ways that reproduced those of their office workplace but their success was achieved at the expense of great anxiety about the future At working class Roosevelt the librarians attended to the rhetoric of librarianship but students reassembled knowledge on their own terms A second project theorizes the school library as a geopolitical space and critiques children s fiction and the social order that its texts help construct through a semiotic analysis of text classification within school libraries An investigation of the origins of that system and of the ways of reading that it promotes with particular attention to the history of the popular novel describes the gender and class based politics of leisure reading
