Styles Of Creation Aesthetic Technique And The Creation Of Fictional Worlds:

Styles of Creation George Edgar Slusser, Eric S. Rabkin, 1992 The impetus behind this collection of original essays is the tension between the aesthetic emphasis on stylistics in science fiction and fantasy writing and the critical limitations imposed by prevailing literary theory From a variety of perspectives the contributors show how a new or expanded set of methods and models can enrich critical exchange within the genre and between it and other types of fiction The focus of the book is not entirely on critical restraints but also on the genre's robustly subversive creative drive its unwillingness or inability to pause for critical validation The essays examine the proliferation of stylistic acts and experiments in science fiction and fantasy writing as assess the genre's revolutionary qualities its reordering of narrative priorities inversion of consecrated categories and elevation of minor devices **Styles of Creation** Eaton conference, 1989 **Styles of Creation : Aesthetic**

Techniques and the Creation of Fictional Worlds George Slusser, Eric S. Rabkin, 1996 Book on science fiction styles of writing **New Approaches in Teaching History** Frederic Krome, 2024-02-14 Science fiction literature and film are an underappreciated source for the teaching of history Finding material that can excite a student's curiosity can be a key towards greater student engagement especially among students who are taking history as a requirement rather than from interest The discovery that they can read or watch science fiction as part of their classwork often comes as a pleasant surprise Beyond its popularity however utilizing science fiction for class assignments has certain pedagogical advantages it introduces students to new vistas in historical thought helps them learn how literature and film can be applied as a primary source and can encourage participation in projects that are enjoyable Each chapter provides case studies focusing on a different subject in the modern history curriculum and in addition to providing an analysis of specific texts and or cinematic sources gives suggestions on assignments for the students Science Fiction Before 1900 Paul K. Alkon, 2013-04-15 Paul

Alkon analyzes several key works that mark the most significant phases in the early evolution of science fiction including Frankenstein Twenty Thousand Leagues Under the Sea A Connecticut Yankee in King Arthur's Court and The Time Machine He places the work in context and discusses the genre and its relation to other kinds of literature **The Shape of Fear** Susan Jennifer Navarette, 2021-05-11 During the last decades of the nineteenth century Charles Darwin Thomas Henry Huxley Walter Pater and others changed the nature of thought concerning the human body and the physical environment that had shaped it In response the 1890s saw the publication of a series of remarkable literary works that had their genesis in the intense scientific and aesthetic activity of those preceding decades texts that emphasized themes of degeneration and were themselves stylistically decompositive with language both a surrogate for physical deformity and a source of anxiety Susan J Navarette examines the ways in which scientific and cultural concerns of late nineteenth century England are coded in the horror literature of the period By contextualizing the structural stylistic and thematic systems developed by writers seeking to reenact textually the entropic forces they perceived in the natural world Navarette reconstructs the late Victorian

mentality She analyzes aesthetic responses to trends in contemporary science and explores horror writers use of scientific methodologies to support their perception that a long awaited period of cultural decline had begun In her analysis of the classics *Turn of the Screw* and *Heart of Darkness* Navarette shows how James and Conrad made artistic use of earlier scientific readings of the body She also considers works by lesser known authors Walter de la Mare Vernon Lee and Arthur Machen who produced fin de siècle stories that took the form of hybrid literary monstrosities To underscore the fascination with bodily decay and deformation that these writers explored *The Shape of Fear* is enhanced with prints and line drawings by Victor Hugo James Ensor and other artists of the day This elegantly written book formulates a new canon of late Victorian fiction that will intrigue scholars of literature and cultural history *Biology and Manners* Regina Yung Lee, Una McCormack, 2020 An essay collection that significantly expands previous scholarly writing on award winning science fiction and fantasy author Lois McMaster Bujold arguing for the significant contributions her works make to feminist and queer thought disability studies and fan studies **Fighting the Future War** Frederic Krome, 2012-03-22 The period between World War I and World War II was one of intense change Everything was modernizing including our technology for making war witness machine guns trench warfare biological agents and ultimately The Final Solution This modernization and eye toward the future was reflected in many facets of pop culture including fashion home wear design and the popular literature of the time In sci fi a specific genre emerged that of the future war Fred Krome has collected many of these future war stories together for the first time in *Fighting the Future War* Bolstered by a comprehensive introduction and introduced with historical information about both the authors of the stories and the historical time period these stories provide a view into the field of pulp science fiction writing the issues that informed the time period between the world wars and the way people envisioned the wars of tomorrow Revealing anxieties about society technology race and politics the genre of the future war story is important material for students of history and literature **Animated 'Worlds'** Suzanne Buchan, 2007-02-20 What do we mean by the term animation when we are discussing film Is it a technique A style A way of seeing or experiencing a world that has little relation to our own lived experience of the world In *Animated Worlds* contributors reveal the astonishing variety of worlds animation confronts us with Essays range from close film analyses to phenomenological and cognitive approaches spectatorship performance literary theory and digital aesthetics Authors include Vivian Sobchack Richard Weihe Thomas Lamarre Paul Wells and Karin Wehn *Bridges to Science Fiction and Fantasy* Gregory Benford, Gary Westfahl, Howard V. popular music video games and non genre fiction are what Csicsery Ronay calls science fictional stimulating science fictional habits of mind We no longer treat science fiction as merely a genre engine producing formulaic effects but as a mode of awareness which frames experiences as if they were aspects of science fiction The Seven Beauties of Science Fiction describes science fiction as a constellation of seven diverse cognitive attractions that are particularly formative of science fictionality These are the seven beauties of the title fictive neology fictive novums future history imaginary science the science fictional sublime the science fictional grotesque and the Technologiade or the epic of technoscience s development into a global regime
