Stylistic Boundaries Among Mobile Hunter Foragers:

Stylistic Boundaries Among Mobile Hunter-foragers Clavil Garth Sampson,1988 In this study of the valley wide distributions of South African decorative motifs Sampson pioneers a methodology for etching band territories out of the archaeological surface trace left by mobile hunter forager societies *African Foragers* Sibel Barut Kusimba,2003-01-21

Study of the development of foraging strategies in Africa from the Middle Stone Age to the present **Social Identities**

Among Archaic Mobile Hunters and Gatherers of the American Southwest Maxine McBrinn,2005 The mobile hunters and gatherers of the Archaic Southwest were members of at least three different kinds of social groups bands endogamous marriage groups and a risk sharing economic network By comparing the geographic distributions of iconological and technological style in cordage sandals and projectile points it is possible to distinguish marriage groups from the larger economic networks Using artifacts from Bat Cave Tularosa Cave and Cordova Cave in the New Mexico Mogollon and from Fresno Shelter in the Tularosa Basin this research demonstrated that technological style in fiber artifacts is more geographically constrained than iconological style in sandals or projectile points indicating that although the bands using these rock shelters came from different marriage groups they participated in the same risk sharing economic network

Boundaries, Borders and Frontiers in Archaeology Bryan Feuer,2016-02-17 Until fairly recently archaeological research has been directed primarily toward the centers of societies rather than their perimeters Yet frontiers and borders precisely because they are peripheral promote interaction between people of different polities and cultures with a wide range of potential outcomes Much work has begun to redress this disparity of focus Drawing on contemporary and ethnographic accounts historical data and archaeological evidence this book covers more than 30 years of research on boundaries borders and frontiers beginning with The Northern Mycenaean Border in Thessaly in 1983 The author discusses various theoretical and methodological issues concerning peripheries as they apply to the archaeological record Political economic social and cultural processes in border and frontier zones are described in detail Three case study societies are examined China Rome and Mycenaean Greece *Archaeological Perspectives on the Southern Appalachians* Ramie A. Gougeon, Maureen

Meyers,2015-03-10 This volume demonstrates how archaeologists working in the Southern Appalachian region over the past 40 years have developed rich interpretations of prehistoric and historic Southeastern Native societies by examining them from multiple scales of analysis The end results of these examinations demonstrate both the uses and the constraints of multiscalar approaches in reconstructing various lifeways across the Southeast **Ethnicity, Hunter-Gatherers, and the**

"Other" Susan Kent,2014-05-20 As the world continues to shrink owing to globalization the need to understand the diversity of culturally distinct societies and their interactions with neighboring groups becomes greater than ever Susan Kent has invited an international team of experts to present their insights into how one type of society African hunter gatherers has managed to survive long past the first contact between foragers farmers and pastoralists The contributors explore many

issues including culture change trade tribute inter group relations autonomy dependence and differential contact histories and rates of change They consider why the association of hunter gatherers with non hunter gatherers has sometimes led to trade between autonomous societies and in other cases has led to assimilation Ethnicity Hunter Gatherers and the Other illuminates both past and present foraging societies by presenting new data and reinterpreting previously collected data within the framework of inter group interactions

The Archaeologist's Laboratory Edward B. Banning, 2020-07-27 This second edition of the classic textbook *The Archaeologist's Laboratory* is a substantially revised work that offers updated information on the archaeological work that follows fieldwork such as the processing and analysis of artifacts and other evidence An overarching theme of this edition is the quality and validity of archaeological arguments and the data we use to support them The book introduces many of the laboratory activities that archaeologists carry out and the ways we can present research results including graphs and artifact illustrations Part I introduces general topics concerning measurement error data quality research design typology probability and databases It also includes data presentation basic artifact conservation and laboratory safety Part II offers brief surveys of the analysis of lithics and ground stone pottery metal artifacts bone and shell artifacts animal and plant remains and sediments as well as dating by stratigraphy seriation and chronometric methods It concludes with a chapter on archaeological illustration and publication A new feature of the book is illustration of concepts through case studies from around the world and from the Palaeolithic to historical archaeology The text is appropriate for senior undergraduate students and will also serve as a useful reference for graduate students and professional archaeologists

Archaeology at the Millennium Gary M. Feinman, T. Douglas Price, 2007-09-27 In this book internationally distinguished contributors consider hot topics in turn of the millennium archaeology and chart an ambitious agenda for the future

The Archaeologist's Laboratory E.B. Banning, 2006-04-11 This text reviews the theory concepts and basic methods involved in archaeological analysis with the aim of familiarizing both students and professionals with its underlying principles Topics covered include the nature and presentation of data database and research design sampling and quantification analyzing lithics pottery faunal and botanical remains interpreting dates and archaeological illustration A glossary of key terms completes the book

Style and Function Teresa D. Hurt, Gordon Rakita, 2000-10-30 The topics of style and function within evolutionary archaeology have been the subject of great debate in the field of archaeology in general over the past two decades Evolutionary archaeologists have a unique perspective on these concepts one that has sometimes been misunderstood by archaeologists working within other theoretical perspectives The dichotomy between style and function was first formulated in the late 1970s by Robert Dunnell and remains axiomatic within the theoretical perspective of evolutionary archaeology The original definitions of style and function were grounded in biological evolutionary concepts regarding neutral variation versus variation that is subject to natural selection Several chapters expand upon these concepts and explore how Darwinian evolutionary theory may be used to understand the archaeological

record Other chapters demonstrate this application through empirical case studies Dunnell provides a foreword introducing and re examining his original thesis This volume is the only text devoted to the topic of style and function within the literature of evolutionary archaeology It provides not only theoretical discussions and augmentation but also significant historical background regarding the development of the style function distinction within archaeology Moreover it presents several case studies that provide examples of how evolutionary style and function may be applied to the prehistoric record

Deep-Time Images in the Age of Globalization Oscar Moro Abadía, Margaret W. Conkey, Josephine McDonald, 2024-05-13 This open access volume explores the impact of globalization on the contemporary study of deep time art The volume explores how early rock art research's Eurocentric biases have shifted with broadened global horizons to facilitate new conversations and discourses in new post colonial realities The book uses seven main themes to explore theoretical methodological ethical and practical developments that are orienting the study of Pleistocene and Holocene arts in the age of globalization Compiling studies as diverse as genetics visualization with the proliferation of increasingly sophisticated archaeological techniques means that vast quantities of materials and techniques are now incorporated into the analysis of the world's visual cultures Deep Time Images in the Age of Globalization aims to promote critical reflection on the multitude of positive and negative impacts that globalization has wrought in rock art research The volume brings new theoretical frameworks as well as engagement with indigenous knowledge and perspectives from art history It highlights technical methodological and interpretive developments and showcases rock art characteristics from previously unknown in the global north geographic areas This book provides comparative approaches on rock art globally and scrutinises the impacts of globalization on research preservation and management of deep time art This book will appeal to archaeologists social scientists and art historians working in the field as well as lovers of rock art

Mammoths, Mastodons, and Elephants Gary Haynes, 1991 This study uses the ecology and behaviour of modern elephants to create models for reconstructing the life and death of extinct mammoths and mastodons

The Archaeology of Southern Africa Peter Mitchell, 2024-06-06 Some of humanity's earliest ancestors lived in southern Africa and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition Building on its rich rock art heritage archaeologists have developed theoretical work that continues to influence rock art studies worldwide with the relationship between archaeological and anthropological data central to understanding past hunter gatherer pastoralist and farmer communities alike New work on pre colonial states contests models that previously explained their emergence via external trade while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency feeding into efforts to decolonise the discipline itself Inhabited by humans longer than almost anywhere else and with an unusually varied complex past southern Africa thus has much to contribute to archaeology worldwide In this revised and updated edition Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years

Histories of Maize John Staller, Robert Tykot, Bruce Benz, 2016-12-05 Maize has been described as a primary catalyst to complex sociocultural development in the Americas State of the art research on maize chronology molecular biology and stable carbon isotope research on ancient human diets have provided additional lines of evidence on the changing role of maize through time and space and its spread throughout the Americas The multidisciplinary evidence from the social and biological sciences presented in this volume have generated a much more complex picture of the economic political and religious significance of maize The volume also includes ethnographic research on the uses and roles of maize in indigenous cultures and a linguistic section that includes chapters on indigenous folk taxonomies and the role and meaning of maize to the development of civilization Histories of Maize is the most comprehensive reference source on the botanical genetic archaeological and anthropological aspects of ancient maize published to date This book will appeal to a varied audience and have no titles competing with it because of its breadth and scope The volume offers a single source of high quality summary information unavailable elsewhere *Human Beginnings in South Africa* H. J. Deacon, Janette Deacon, 1999 Specialists in Stone Age archaeology in South Africa present the results of nearly 150 years of research that follows the development of humans from their early beginnings to the late 19th century They offer evidence that the roots of South African society stretch back into the Stone Age Annotation copyrighted by Book News Inc Portland OR *Native American Interactions* Michael S. Nassaney, Kenneth E. Sassaman, 1995 While the early cultural clashes between Native Americans and Europeans have long engaged scholars far less attention has been paid to interactions among indigenous peoples themselves prior to the contact period The essays in this volume derived largely from the 1992 meeting of the Southeastern Archaeological Conference mark a major step in correcting that imbalance Long before Europeans sailed west in search of the East Native Americans of various ethnic groups were encountering each other and interacting socially both amicably and otherwise Over the course of ten thousand years from Paleoindian to Mississippian times these interactions had a profound effect on the historical development of these societies and their material culture social relations and institutions of integration In probing such encounters the contributors reject reductive models and instead combine a variety of theoretical orientations including world systems theory Marxist analysis and ecosystems approaches with empirical evidence from the archaeological record Dawn of the Metal Age Jonathan M. Golden, 2016-04-08 The fifth millennium BCE was a period of rapid social change One of the key factors was the developments in technology which led to the rise of the metals industry Archaeological finds from sites dating to the Chalcolithic period indicate the production and use of copper Dawn of the Metal Age examines a range of sites from copper mines in Jordan and Israel to the villages of the northern Negev where copper was produced in household workshops to a series of cave burials where a range of luxury metal goods were buried with the elite members of Chalcolithic society Ancient technology is reconstructed from the archaeological evidence which also illuminates the changing economic social religious and political environment of the time Handbook of Landscape Archaeology Bruno David, Julian

Thomas,2016-06-03 Over the past three decades landscape has become an umbrella term to describe many different strands of archaeology From the processualist study of settlement patterns to the phenomenologist s experience of the natural world from human impact on past environments to the environment s impact on human thought action and interaction the term has been used In this volume for the first time over 80 archaeologists from three continents attempt a comprehensive definition of the ideas and practices of landscape archaeology covering the theoretical and the practical the research and conservation and encasing the term in a global framework As a basic reference volume for landscape archaeology this volume will be the benchmark for decades to come All royalties on this Handbook are donated to the World Archaeological Congress

Foraging in the Past Lemke,2019-02-15 The label hunter gatherer covers an extremely diverse range of societies and behaviors yet most of what is known is provided by ethnographic and historical data that cannot be used to interpret prehistory Foraging in the Past takes an explicitly archaeological approach to the potential of the archaeological record to document the variability and time depth of hunter gatherers Well established and young scholars present new prehistoric data and describe new methods and theories to investigate ancient forager lifeways and document hunter gatherer variability across the globe The authors use relationships established by cross cultural data as a background for examining the empirical patterns of prehistory Covering underwater sites in North America the peaks of the Andes Asian rainforests and beyond chapters are data rich methodologically sound and theoretically nuanced effectively exploring the latest evidence for behavioral diversity in the fundamental process of hunting and gathering Foraging in the Past establishes how hunter gatherers can be considered archaeologically extending beyond the reach of ethnographers and historians to argue that only through archaeological research can the full range of hunter gatherer variability be documented Presenting a comprehensive and integrated approach to forager diversity in the past the volume will be of significance to both students and scholars working with or teaching about hunter gatherers Contributors Nicholas J Conard Raven Garvey Keiko Kitagawa John Krigbaum Petra Kr nneck Steven Kuhn Julia Lee Thorp Peter Mitchell Katherine Moore Susanne C M nzel Kurt Rademaker Patrick Roberts Britt Starkovich Brian A Stewart Mary Stiner The Settlement of the American Continents C. Michael

Barton,Geoffrey A. Clark,David R. Yesner,Georges A. Pearson,2016-03-04 When many scholars are asked about early human settlement in the Americas they might point to a handful of archaeological sites as evidence Yet the process was not a simple one and today there is no consistent argument favoring a particular scenario for the peopling of the New World This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event It considers many of the questions that continue to surround the peopling of the Western Hemisphere focusing not on sites dates and artifacts but rather on theories and models that attempt to explain how the colonization occurred Unlike other studies this book draws on a wide range of disciplines archaeology human genetics and osteology linguistics ethnology and ecology to present the big picture of this migration Its

wide ranging content considers who the Pleistocene settlers were and where they came from their likely routes of migration and the ecological role of these pioneers and the consequences of colonization Comprehensive in both geographic and topical coverage the contributions include an explanation of how the first inhabitants could have spread across North America within several centuries the most comprehensive review of new mitochondrial DNA and Y chromosome data relating to the colonization and a critique of recent linguistic theories Although the authors lean toward a conservative rather than an extreme chronology this volume goes beyond the simplistic emphasis on dating that has dominated the debate so far to a concern with late Pleistocene forager adaptations and how foragers may have coped with a wide range of environmental and ecological factors It offers researchers in this exciting field the most complete summary of current knowledge and provides non specialists and general readers with new answers to the questions surrounding the origins of the first Americans
