## **Submarine Warfare Monsters Midgets:**

**Submarine Warfare** Richard Compton-Hall, 1985-01-01      **Midget Submarines of the Second World War** Paul Kemp, 1999 The author looks at why major navies engaged in the development of midget submarines during World War II

*Submarines* Paul E. Fontenoy, 2007-03-28 From the steam powered models introduced in World War I to today's nuclear powered multiweaponed technological wonders submarines have revolutionized warfare on the world's seas This volume follows the extraordinary development of this key component of the world's navies *Submarines An Illustrated History of Their Impact* reveals how underwater warships evolved to become major threats to battle fleets and merchant shipping as well as primary platforms for deterrent forces and crucial symbols of military power In a series of chronological chapters *Submarines* describes key developments in diving ability underwater endurance and weapons capabilities in specific periods while highlighting strategic and operational innovations the role of technological research famous submarine events battles and commanders and the impact of submarine services on naval society The book also includes an illustrated reference section covering every submarine class worldwide since 1900 This coverage plus additional reference features make *Submarines* an essential introduction to a weapons system that has long held the public's imagination

*Torpedo* Roger Branfill-Cook, 2014-08-27 An encyclopedic study of the ship killer par excellence from its development to post World War II usage A well written book lavishly illustrated *International Journal of Maritime History* The torpedo was the greatest single game changer in the history of naval warfare For the first time it allowed a small cheap torpedo firing vessel and by extension a small minor navy to threaten the largest and most powerful warships afloat The traditional concept of seapower based on huge fleets of expensive capital ships required radical rethinking because of this important naval weapon This book is a broad ranging international history of the weapon tracing not only its origins and technical progress down to the present day but also its massive impact on all subsequent naval wars *Torpedo* contains much new technical information that has come to light over the past thirty years and covers all of the improved capabilities of the weapon Heavily illustrated with photos and technical drawings this is a book no enthusiast or historian can afford to miss The torpedo one of the most fearsome weapons ever created by man is well worth its own history

*Forum Navale      The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual* Ron Martini, 2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal      *Spec Ops*

William H. McRaven,2009-02-04 Vice Adm William H McRaven helped to devise the strategy for how to bring down Osama bin Laden and commanded the courageous U S military unit that carried it out on May 1 2011 ending one of the greatest manhunts in history In Spec Ops a well organized and deeply researched study McRaven analyzes eight classic special operations Six are from WWII the German commando raid on the Belgian fort Eben Emael 1940 the Italian torpedo attack on the Alexandria harbor 1941 the British commando raid on Nazaire France 1942 the German glider rescue of Benito Mussolini 1943 the British midget submarine attack on the Tirpitz 1943 and the U S Ranger rescue mission at the Cabanatuan POW camp in the Philippines 1945 The two post WWII examples are the U S Army raid on the Son Tay POW camp in North Vietnam 1970 and the Israeli rescue of the skyjacked hostages in Entebbe Uganda 1976 McRaven who commands a U S Navy SEAL team pinpoints six essential principles of spec ops success simplicity security repetition surprise speed and purpose For each of the case studies he provides political and military context a meticulous reconstruction of the mission itself and an analysis of the operation in relation to his six principles McRaven deems the Son Tay raid the best modern example of a successful spec op which should be considered textbook material for future missions His own book is an instructive textbook that will be closely studied by students of the military arts Maps photos

**Submarines at War 1914-1918** Richard Compton-Hall,2004-04 This work is a landmark history of submarine warfare during World War I An ex submariner the author captures the essence of what is what like to operate in these new and lethal craft This periscope eye view introduces the reader to the great submarine commanders the tactics they employed and the often futile attempts made to sink them

Hot Straight and Normal Ron Martini,2001 Hot Straight and Normal is a submarine bibliography with over 6000 references to books videos articles and Internet sources It is designed to assist reseachers historians students teachers collectors and others with an interest in submarines their history construction and use in wars worldwide It s unique format of listing the books by title will assists the researcher and casual reader alike in finding or searching for familiar words and subjects Fiction book titles are also included Each listing contains title author date published publisher page count ISBN number and other informative descriptions if known This is the only submarine bibliography currently in publication The article index includes all articles in all issues of Naval Submarine League s Submarine Review and Naval Institute s Naval Proceedings magazine There are Web sites and other Internet sources listed and even information on obtaining more information through the Freedom of Information Act Also included is how to find materials inside government archives

Collected and edited by a former U S submariner and member of U S Submarine Veterans Inc **Encyclopedia of British Submarines 1901-1955** Paul Akermann,2002-11 The history of the development of submarines covered in this book spans the most tumultuous years of the 20th century When the little Holland No 1 was launched in 1901 few could guess that the submarine would become the most potent weapon of war ever developed **Australian Submarines Vol 2** Michael

White,2015-11-01 The book commences with a discussion of the policy issues as to whether Australia needed submarines and

then the decision to buy AE1 and AE2 It then goes through their coming to Australia the tragic loss of AE1 in New Guinea on 14 September 1914 and the bravery and daring of the AE2 crew in penetrating the Dardanelles on Anzac Day in 1915 The history then goes on to deal with the J Class submarines that came to Australia in 1919 the first Oxley and Otway which went to the RN in the Depression in 1931 and the fact that in World War Two Australia had no submarines except for the Dutch K IX whose career ended with a battery explosion in 1944 Then the period of the RN Fourth Submarine Squadron based in Sydney is dealt with including some of the happy memories of those who served in it The book sets out the story of the new RAN submarine arm from 1963 When Oxley S 57 arrived in Neutral Bay Sydney in 1967 so began the new Australian era of submarines The basic dates of the O Boats are outlined along with the building and basic dates of the Collins class The book deals with some of the issues about the intelligence patrols about the Future Submarine and also records the numerous plaques services memorials and museums in Australia and overseas dedicated to Australian submarines and Australian and NZ submariners There is a detailed chapter on special submarine craft such as the X Craft in which some of the submarine heroes like Max Sheean Henty Henty Creer and Ken Briggs served and in some cases died The appendices to this book are numerous and detailed by a strong team from around the world including Garry Mellon Barrie Downer and Pat Heffernan Numerous photographs have been collected and included in the book to fit in with the text from Darren Brown and others The appendices also list all Australian submariners who have qualified and served up until mid 2014 including those who have died

**Cold War Submarines** Norman Polmar, Kenneth J. Moore, 2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary s homeland providing in many respects the most survivable nuclear deterrent of the Cold War For both East and West the modern submarine originated in German U boat designs obtained at the end of World War II Although enjoying a similar technology base by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence

*The Submarine* Duncan Redford, 2010-07-30 Underhand and damned un English was the view of submarines in Edwardian Britain Yet by the 1960s the new nuclear powered submarines were seen by the Royal Navy as being the hallmark of a first class navy In this book Duncan Redford a retired Royal Navy submarine officer explores how and why attitudes to the submarine changed in Britain between 1900 and 1977 Using a wide array of previously unpublished sources Redford sheds light on what the British thought about submarines both their own and those that were used against them Rather than providing an operational history of Britain s submarines this book looks at naval and civilian conceptions of what submarine warfare was imagined to

be like in the context of unrestricted submarine warfare the world wars and the development of nuclear weaponry With chapters on the coronation and jubilee reviews at Spithead the submarine in novels and films as well as coverage of the Royal Navy's and civilian views of submarines and submarine warfare this book gives a comprehensive view of the British regard or lack of it for the submarine Through the examination of the British relationship with submarines since 1900 it is possible to see changing patterns in acceptance and tensions between different sub cultures both civil and maritime Since 1900 the meaning constructed around submarines has changed as the submarine has progressed along a road from perdition as the weapon of the weaker power and morally weaker power too to a form of redemption as a major capital unit This book will be essential for naval historians students and those interested in aspects of submarine development and use War Beneath the Sea Peter Padfield, 2008-05-02 Praise for War Beneath the Sea I am truly filled with awe and admiration fascinating and a great contribution to the entire lore of submarines I wish I had written the book Capt Edward L Beach USN Ret author of Run Silent Run Deep Peter Padfield is the best British naval historian of his generation now working His book will now become the standard work on the subject Daily Telegraph London Peter Padfield has produced by far the best and most complete critical history of the submarine operations of all the combatants in the Second World War at the same time providing vivid narrative accounts of particular actions and events Lloyd's List London An excellent account of submarine warfare in 1939-45 it recreates the tribulations and horrors of that especially brutal form of warfare within a sturdily analytical and often critical framework The Economist A marvelously complete and detailed study of World War II submarine warfare an interesting serious and timely book Houston Chronicle A brilliant submarine warfare study Military Review

**Italian Assault Craft, 1940-1945** Erminio Bagnasco, 2024-10-01 In stark contrast to the rather modest performance of its large surface fleet in the Second World War the Italian Navy's smallest units achieved its most spectacular successes It made a specialty of unconventional methods of attack explosive motor boats human torpedoes and miniature submarines that were employed with ingenuity and daring to surprise discomfort and baffle the enemy In December 1941 the whole balance of the naval war in the Mediterranean was altered by six frogmen riding three of the SLC craft they called maiale pigs who penetrated Alexandria harbor to cripple the battleships Valiant and Queen Elizabeth surely one of the most impressive ratios of results to resources in naval history This book is the first complete history of these craft both the details of the technology and the history of their deployment Beginning in the Great War with the extraordinary jumping boats designed to scale harbor boom defenses the story takes in the inter war development of both lightweight surface craft and underwater systems from small submarines to Gamma assault divers By way of comparison equivalent developments in other navies are analyzed including the British chariots which were little more than copies of the Italian SLCs Every operation by these craft is described cataloging the forces involved and the results from high profile successes like the sinking of the cruiser York by explosive motorboat to lesser known incidents the use of such craft by the Israelis as late as 1948 for example Many were

carried out by the famous Decima MAS a unit as legendary in Italy as the SAS in Britain and this book provides a comprehensive chronicle of their activities Originally commissioned by CABI Cattaneo that designed and built most of these craft Italian Assault Craft benefited from unrestricted access to the company s archives technical drawings and photo collection so it is replete with rarely seen illustrations Very much secret weapons in their day they are here revealed in full detail for the first time      Submarine Tom Clancy, John Gresham, 2003-05-06 Only the author of The Hunt for Red October could capture the reality of life aboard a nuclear submarine Only a writer of Mr Clancy s magnitude could obtain security clearance for information diagrams and photographs never before available to the public Now every civilian can enter this top secret world the weapons the procedures the people themselves the startling facts behind the fiction that made Tom Clancy a 1 bestselling author      Operation Storm John Geoghegan, 2014-03-18 The riveting true story of Japan s top secret plan to change the course of World War II using a squadron of mammoth submarines a generation ahead of their time In 1941 the architects of Japan s sneak attack on Pearl Harbor planned a bold follow up a potentially devastating air raid this time against New York City and Washington DC The classified Japanese program required developing a squadron of top secret submarines the Sen toku or I 400 class designed as underwater aircraft carriers each equipped with three Aichi M6A1 attack bombers painted to look like U S aircraft The bombers called Seiran which translates as storm from a clear sky were tucked in a huge water tight hanger on the sub s deck The subs mission was to travel more than halfway around the world surface on the U S coast and launch their deadly air attack This entire operation was unknown to U S intelligence And the amazing thing is how close the Japanese came to pulling it off John Geoghegan s meticulous research including first person accounts from the I 401 crew and the U S capturing party creates a fascinating portrait of the Sen toku s desperate push into Allied waters and the U S Navy s dramatic pursuit masterfully illuminating a previously forgotten story of the Pacific war

*Concepts in Submarine Design* Roy Burcher, Louis J. Rydill, 1995-10-27 This book explores the many engineering and architectural aspects of submarine design and how they relate to each other and the operational performance required of the vessel Concepts of hydrodynamics structure powering and dynamics are explained in addition to architectural considerations which bear on the submarine design process The interplay between these aspects of design is given particular attention and a final chapter is devoted to the generation of the concept design for the submarine as a whole Submarine design makes extensive use of computer aids and examples of algorithms used in concept design are given The emphasis in the book is on providing engineering insight as well as an understanding of the intricacies of the submarine design process It will serve as a text for students and as a reference manual for practising engineers and designers      **Conduct And Support Of**

**Amphibious Operations From United States Submarines In World War II** LCDR Brian J. Haggerty USN, 2015-11-06 The U S Navy is building Virginia class submarines and recently completed the conversion of four Ohio class submarines from Trident Ballistic Missile Submarines SSBN s to Guided Missile Submarines SSGNs The Virginia class is the first nuclear

powered fast attack submarine SSN that shipyards designed with SOF capability without requiring conversion The SSGN conversion of the first four Ohio class submarines included substantial SOF capability These construction and conversion projects represent a significant investment in SOF and amphibious capabilities and they follow a long line of submarine conversions that began early in World War II By analyzing three World War II operations this monograph argues that knowing what actually happened in amphibious operations conducted and supported by American submarines in World War II provides valuable insight about the scope of capabilities challenges and benefits of submarines for these kinds of missions in naval warfare The first operation is an amphibious raid on Makin Atoll The second involves the amphibious landings on the northwest Africa coast as part of Operation Torch The final operation includes the landings on Attu Island in the Aleutian chain

**Hero of the Upholder** Jim Allaway, 2004-04 This volume is Allaway's international biography of Britain's greatest ever submarine captain
