Subordination Oxford Studies In Typology And Linguistic Theory:

Subordination Sonia Cristofaro, 2003-07-10 This book presents a typology of subordination systems across the world's languages. Traditional definitions of subordination are based on morphosyntactic criteria such as clausal embedding or non-finiteness. The book shows that these definitions are untenable in a cross-linguistic perspective and provides a cognitively based definition of subordination. The analysis is based on a representative 80 language sample and represents the broadest study so far conducted on the cross-linguistic coding of several types of complement adverbial and relative sentence. These sentence types display considerable structural variation across languages. However, this variation turns out to be constrained and appears crucially related to the functional properties of individual sentence types. This work is the first systematic attempt to establish comprehensive implicational hierarchies describing the coding of complement adverbial and relative sentences at a single stroke. Concepts from typological theory and cognitive linguistics are integrated to account for these hierarchies.

A Grammar of Shaowu Sing Sing Ngai, 2021-09-20 This is the first comprehensive grammar of Shaowu, a Min language spoken in Shaowu city and its environs in northwestern Fujian province, China. The book offers first-hand linguistic data collected over four years in the field, now placed at the disposal of researchers and students working in language documentation, comparative linguistics, and Sinitic typology. It can serve as a reference grammar for those interested in learning the Shaowu language, thereby helping to preserve it. In addition, the book provides insights into Shaowu's classification, which has been widely debated, thus elucidating its genetic affiliation. The book first presents Shaowu's geography, demography, and history. It then profiles the language's phonology and lexicon before providing a detailed description of its syntax, notably on its nominal, predicate, clausal, and complex sentence structures, which are the focus of the book. The typological profile of Shaowu is also treated, with the conclusion that the language has Gan, Hakka, Mandarin, and even some Wu overlays on its Min base. The Shaowu language serves an excellent example to illustrate the degree of hybridity a language can attain due to intensive language contact over time.

Clause Linking and Clause Hierarchy Isabelle Bril, 2010 This collective volume explores clause linkage strategies in a cross-linguistic perspective, with greater emphasis on subordination. Part I presents some theoretical reassessment of syntactic terminologies and distinctive criteria for subordination, as well as typological methods based on sets of variables and statistics allowing cross-linguistic comparability. Part II deals with strategies relating to clause chaining, conjunctive conjugations, converbial constructions, and *masdars*. Part III centers on the interaction between the syntax, pragmatics, and semantics of clause linking and subordination in relation to information structure, referential hierarchy, and correlative constructions. Part IV presents insights into the clause linking and subordinating functions of some TAM markers, verbal inflectional morphology, and conjugation systems, which may also interact with information structure via the backgrounding effects and lack of illocutionary force of some aspect and mood forms. The volume is of particular interest to linguists and typologists working on clause linkage systems.

and on the interface between syntax pragmatics and semantics *A grammar of Gyeli* Nadine Grimm ,2021 This grammar offers a grammatical description of the Ngo lo variety of Gyeli an endangered Bantu A80 language spoken by 4 000 5 000 Pygmy hunter gatherers in southern Cameroon It represents one of the most comprehensive descriptions of a northwestern Bantu language The grammatical description which is couched in a form to function approach covers all levels of language ranging from Gyeli phonology to its information structure and complex clauses It draws on nineteen months of fieldwork carried out as part of the Bagyeli Bakola DoBeS Documentation of Endangered Languages project between 2010 and 2014 The resulting multimodal corpus from that project which includes texts of diverse genres such as traditional stories narratives multi party conversations and dialogues procedural texts and songs provides the empirical basis for the grammatical description The documentary text collection supplemented by data from elicitation work questionnaires and experiments are accessible in the Bagyeli Bakola collection of The Language Archive With additional ethnographic sociolinguistic diachronic and comparative remarks the grammar may appeal to a wider audience in general linguistics typology Bantu studies and anthropology In 2019 the grammar received the P ini Award by the Association for Linguistic Typology **A Grammar of Alto Perené (Arawak)** Elena Mihás,2015-06-26 Ash ninka Peren belongs to the Kampa group of the Arawak family located in the central Peruvian Amazon in the foothills of the Andes mountains While limited grammatical studies of Kampa languages exist this grammar is by far the most comprehensive study of any language of this sub family and is one of only two or three comparable studies of Arawak languages more generally *Subordination* ,2003

Cognitive Paths into the Slavic Domain Dagmar Divjak,Agata Kochanska,2008-10-23 The volume presents an overview of recent cognitive linguistic research on Slavic languages Slavic languages with their rich inflectional morphology in both the nominal and the verbal system provide an important testing ground for a linguistic theory that seeks to motivate linguistic structure Therefore the volume touches upon a wide range of phenomena it addresses issues related to the semantics of grammatical case tense aspect voice and word order it looks into grammaticalization and language change and discusses sound symbolism At the same time the analyses presented address a variety of theoretically important issues Take for example the role of virtual entities in language or that of iconic motivation in grammar the importance of metaphor for grammaticalization or that of subjectification for motivating synchronic polysemy and diachronic language change as well as the myriad of patterns available to encode events in a non canonical way or to convey the speaker s epistemic stance with respect to the communicated content In addition the analyses are couched in a variety of cognitive linguistic frameworks such as cognitive grammar mental space theory construction grammar frame semantics grammaticalization theory as well as prototype semantics All in all the analyses presented in this volume enrich the understanding of established aspects of the cognitive model of language and may serve as catalysts for their further development and refinement making the volume a worthwhile read for Slavic and cognitive linguists alike Corpora in Cognitive Linguistics Stefan Th. Gries,Anatol

Stefanowitsch, 2008-08-22 Cognitive Linguistics the branch of linguistics that tries to make one's account of human language accord with what is generally known about the mind and the brain has become one of the most flourishing fields of contemporary linguistics The chapters address many classic topics of Cognitive Linguistics These topics include studies on the semantics of specific words including polysemy and synonymy as well as semantic characteristics of particular syntactic patterns constructions including constructional synonymy and the schematicity of constructions the analysis of causatives transitivity and image schematic aspects of posture verbs The key characteristic of this volume is that all papers adopt the methodological perspective of Corpus Linguistics the rapidly evolving branch of linguistics based on the computerized analysis of language used in authentic settings Thus the contributions do not only all provide various new insights in their respective fields they also introduce new data as well as new corpus based and quantitative methods of analysis On the basis of their findings the authors discuss both theoretical implications going well beyond the singular topics of the studies and show how the discipline of Cognitive Linguistics can benefit from the rigorous analysis of naturally occurring language The languages which are investigated are English German Dutch and Russian and the data come from a variety of different corpora As such the present volume will be of interest to a wide range of scholars with many different foci and interests and should pave the way for further integration of usage based techniques of analysis within this exciting paradigm

Participles Ksenia Shagal, 2019-11-05 The book is the first large scale typological study of participles based on data from more than 100 languages Its main aim is to model the diversity of non finite verb forms involved in adnominal modification Participles are examined with respect to several morphological and syntactic parameters and are shown to be a versatile cross linguistic category The book is of interest to language typologists and descriptive linguists **Research Methods in**

Linguistics Robert J. Podesva, Devyani Sharma, 2014-01-23 A comprehensive guide to conducting research projects in linguistics this book provides a complete training in state of the art data collection processing and analysis techniques The book follows the structure of a research project guiding the reader through the steps involved in collecting and processing data and providing a solid foundation for linguistic analysis All major research methods are covered each by a leading expert Rather than focusing on narrow specializations the text fosters interdisciplinarity with many chapters focusing on shared methods such as sampling experimental design transcription and constructing an argument Highly practical the book offers helpful tips on how and where to get started depending on the nature of the research question The only book that covers the full range of methods used across the field this student friendly text is also a helpful reference source for the more experienced researcher and current practitioner Causation, Permission, and Transfer Brian Nolan, Gudrun Rawoens, Elke

Diedrichsen, 2015-01-14 This book offers a comprehensive investigative study of the argument realisation of the concepts of causative purpose permit let allow and transfer in a broad cross linguistic typologically diverse mix of languages with GIVE GET TAKE PUT and LET verbs This volume stands as the first systematic exploration of these verbs and concepts as they

occur in complex events and clauses This book brings together scholars and researchers from a variety of functionally inspired theoretical backgrounds that have worked on these verbs within one language or from a cross linguistic perspective The objective is to understand the linguistic behaviour of the verbs and their inter relationships within a contemporary cognitive functional linguistic perspective The languages represented include Irish German Slavic West Slavic Polish Czech Slovak and Sorbian and Western South Slavic Slovenian and Bosnian Croatian Serbian Germanic Romance Gan Chinese Yichun dialect M ori Bohairic Coptic Shaowu Chinese Hebrew English Lithuanian Estonian the Australian dialects Pitjantjatjara and Yankunytjatjara Italian and Persian Topics discussed include argument structure and the encoding of arguments under causation permission and transfer verbs their lexical semantics and event structure *Diverse Scenarios of Syntactic Complexity* Albert Álvarez González, Zarina Estrada-Fernández, Claudine Chamoreau, 2019-07-15 This volume surveys the phenomenon of syntactic complexity in a diversity of languages and from a diversity of theoretical perspectives The topics include clause combining strategies such as relative complement and adverbial clauses serialization clausal nominalizations but also the switch reference systems involved in clause chains the role of insubordination and the influence of language contact in the development of syntactic complexity as well as the acquisition of complex clauses in child language and the grammaticalization processes leading to syntactic complexity These studies illustrate the varied aspects involved in clause combining and help to understand how syntactic complexity works and evolves in the world's languages how it varies across languages how it is influenced by language contact how it is acquired As such this book gives the opportunity for readers to expand both their typological and their theoretical knowledge about syntactic complexity in a variety of languages

Information Structure and Reference Tracking in Complex Sentences Rik van Gijn, Jeremy Hammond, Dejan Mati?, Saskia van Putten, Ana Vilacy Galucio, 2014-03-15 This volume is dedicated to exploring the crossroads where complex sentences and information management more specifically information structure and reference tracking come together Complex sentences are a highly relevant but understudied domain for studying notions of IS and RT On the one hand a complex sentence can be studied as a mini unit of discourse consisting of two or more elements describing events situations or processes with its own internal information structural and referential organization On the other hand complex sentences can be studied as parts of larger discourse structures such as narratives or conversations in terms of how their information structural characteristics relate to this wider context The book offers new perspectives for the study of the interaction between complex sentences and information management and moreover adds typological breadth by focusing on lesser studied languages from several parts of the world

Language Acquisition Diāna Laiveniece, 2016-03-08 This volume brings together a selection of articles about research conducted on language acquisition in the Baltic States namely in Latvia and Lithuania a field which has witnessed massive growth in recent years The book begins with an introduction which specifies the problems investigated by the contributions in order to acquaint the reader with current issues and

research in linguodidactics and applied linguistics The volume will particularly appeal to scholars of language acquisition as well as anyone interested in research and practical activities concerning language education in the Baltic States The papers compiled here are grouped into five sections language acquisition in the context of bilingualism and multilingualism pedagogical factors of language acquisition research on literacy language acquisition at an early age and research in linguodidactics to assist language acquisition This volume will stimulate the reader to ask questions think of solutions argue and propose counterarguments with regards to language acquisition in this region The driving force in this field is dialogue and argumentative discussion not utilitarian notes and advice and through detailing a range of views on language acquisition problems and perspectives the book achieves that aim Jesus and Gospel Traditions in Bilingual Context Sang-Il Lee, 2012-04-26 Most historical Jesus and Gospel scholars have supposed three hypotheses of unidirectionality geographically the more Judaeo Palestinian the earlier modally the more oral the earlier and linguistically the more Aramaized the earlier These are based on the chronological assumption of the earlier the more original These four long held hypotheses have been applied as authenticity criteria However this book proposes that linguistic milieus of 1st century Palestine and the Roman Near East were bilingual in Greek and vernacular languages and that the earliest church in Jerusalem was a bilingual Christian community The study of bilingualism blurs the lines between each of the temporal dichotomies The bilingual approach undermines unidirectional assumptions prevalent among Gospels and Acts scholarship with regard to the major issues of source criticism textual criticism form criticism redaction criticism literary criticism the Synoptic Problem the Historical Jesus provenances of the Gospels and Acts the development of Christological titles and the development of early Christianity There is a need for New Testament studies to rethink the major issues from the perspective of the interdirectionality theory based on bilingualism **The Routledge Handbook of Pidgin and Creole Languages** Umberto Ansaldi, Miriam Meyerhoff, 2020-11-29 The Routledge Handbook of Pidgin and Creole Languages offers a state of the art collection of original contributions in the area of Pidgin and Creole studies Providing unique and equal coverage of nearly all parts of the world where such languages are found as well as situating each area within a rich socio historical context this book presents fresh and diverse interdisciplinary perspectives from leading voices in the field Divided into three sections its analysis covers Space and place areal perspective on pidgin and creole languages Usage function and power sociolinguistic and artistic perspectives on pidgins and creoles creoles as sociocultural phenomena Framing of the study of pidgin and creole languages history of the field interdisciplinary connections Demonstrating how fundamentally human and natural these communication systems are how rich in expressive power and sophisticated in their complexity The Routledge Handbook of Pidgin and Creole Languages is an essential reference for anyone with an interest in this area The Modal System of Earlier Egyptian Complement Clauses Sami Uljas, 2007 This volume presents a novel analysis of complement clauses in Earlier Egyptian language The grammar of these constructions is shown to be organised around a system for

expressing Irrealis and Realis modality Subjects in Constructions – Canonical and Non-Canonical Marja-Liisa Helasvuo, Tuomas Huomo, 2015-01-14 This volume analyzes constructions with non canonical subjects in individual languages and cross linguistically drawing on insights from cognitive and discourse functional linguistics Prototypical subjects have often been characterized in terms of their semantic syntactic and discourse features such as animacy agentivity topicality referentiality definiteness and autonomy of existence of the subject referent A non canonical subject is one that lacks some of these features This may be reflected in its meaning grammatical coding and or discourse function In discussing non canonical subjects in individual languages and cross linguistically the chapters in the volume address the following more general topics What kinds of grammatical semantic and discourse criteria can be used to distinguish subjects from non subjects To what extent are subject criteria construction specific What kinds of constructions have non canonical subjects What are the semantic and discourse functions of constructions with non canonical subjects Are subjects which are grammatically non canonical also atypical in terms of their discourse features **Discourse structure and narration: A diachronic view from Germanic** Ulrike Demske, Barthe Bloom, 2025-06-20 The volume Discourse structure and narration A diachronic view from Germanic deals with questions of information structuring at discourse level focusing on narrative discourses More precisely it is about the contribution of grammatical devices to the organization of texts as well as their diagnostic potential for the narrative text type Although it is well known that information packaging had a much greater impact on the distribution of grammatical patterns in historical stages of a language than it does today so far many studies on the relationship between information structure and grammatical patterns do not go beyond the sentence level in other words they do not take into account the possible influence of the text type on the manifestation of certain grammatical patterns How and to which degree changes in grammatical patterns correlate or are affected by changes in either discourse and or narrative structure how the two layers interact with each other and affect each other and how such issues can be operationalized are still understudied This volume aims to shed more light on these issues by presenting eight papers which address these questions more or less explicitly As the research questions imply the papers all take a historical or diachronic perspective Another commonality between the studies is that they all focus on data from Germanic languages as we assume that by comparing closely related languages the relationships in question become more pronounced Specifically the languages in question are German Dutch English and Icelandic Understandably the contributions in this volume can only highlight some aspects of the complex relationship between grammar and narration s Addressing among others questions of narrative progression temporal structure reference tracking and discourse functions the contributions discuss phenomena such as temporal adverbials at the left periphery as well as later in the clause left dislocation structures fronting of the finite verb in dependent and independent clauses linguistic means to express aspectual and tense information and the distribution of nominalization patterns across text types **Functional Discourse Grammar** Kees Hengeveld, J. Lachlan

Mackenzie, 2008-08-07 This is the first comprehensive presentation of Functional Discourse Grammar. The authors set out its nature and origins and show how it relates to contemporary linguistic theory. They demonstrate and test its explanatory power and descriptive utility against linguistic facts from over 150 languages across a full range of linguistic families.
