Strategies for Addition and Subtraction Facts Within 18 Maria Miller,2015-12-30 Strategies for Addition such as adding just one more a trickwith nine and eight and subtracting using addition Memorizing the basic addition and subtraction facts of single digit numbers In the first several lessons we study basic strategies for adding and subtracting within 0 20 such as adding one more a trick for adding 9 or 8 subtracting to 10 and subtracting using addition After those we study the idea of completing ten and going over For example the child adds 8 5 by first adding 8 2 which makes 10 and then adding the 3 that was left over All of these lessons in the beginning part prepare the student for the next part of the workbook which has to do with memorizing the basic addition facts The next lessons in the workbook Adding with 9 Adding with 8 Adding with 7 and Adding with 6 provide lots of practice for learning and memorizing the basic addition facts There are 20 such facts from 9 2 to 9 9 8 facts lesson Adding with 9 from 8 3 to 8 8 6 facts lesson Adding with 8 from 7 4 to 7 7 4 facts lesson Adding with 7 from 6 5 to 6 6 2 facts lesson Adding with 6 Some children will accomplish this more quickly and need less practice Some will need more practice You can also add in some Internet based games a list of online games is provided Learning and memorizing the basic addition and subtraction facts of single digit numbers is very important for later study For example regrouping carrying borrowing in addition and in subtraction requires that the student is able to recall all the sums of single digit numbers and corresponding subtraction facts efficiently and fluently The goal is to memorize these facts or at least become so fluent with them that an outsider cannot tell if the student remembers the answer or uses some mental math strategy to get the answer
