and is intended to help management meet the needs of not only today's ever changing world but to anticipate what may be required in the future to achieve superior customer service profitability and a competitive advantage

### **Management of Information Systems** Maria Pomffyova, 2018-10-24

Management functions were developed first as a systematic step to carry out management activities while implementation of the information components followed as part of management elements. The authors point out that the use of the possibilities and advantages of quantitatively supported managerial decisions gives managers the ability to quantify the impacts of both technical hard and subjective soft constraints and improve managerial decision making processes that would otherwise be based mostly on personal intuition and experience. To achieve the goals and benefits of excellent performance it is necessary to design and develop integrated models that would coordinate management functions and information system components as an integrated process. These facts are presented in various case studies.
