although North American society has long been characterized as secular this does not deny the potency of spiritual concerns and religious values on the individual level Polls affirm that vast majorities of North Americans both believe in God and consider religion important in their lives This is clearly evident when one faces the crisis of dying or bereavement For one of the strengths of belief is that it provides support and succor at a time when secular explanations are largely silent For these reasons educators and clinicians have long recognized the significance that religious and spiritual themes have in counseling with the dying and bereaved Yet in cultures as religiously diverse as the U S and Canada caregivers and educators may feel inadequate to the task Death and Spirituality addresses this need Specifically it seeks to reach two perhaps overlapping audiences First it considers the needs death related counselors and educators seeking to provide them with both a sense of the norm of religious tradition and the religious and spiritual issues that might arise in illness and bereavement as well as suitable interventions approaches and resources that might be useful in assisting clients in examining and resolving such issues The book also speaks to the complementary needs of clergy who also may wish to assist parishioners and others as they face the spiritual and psychological crisis of dying and grief
