Theory in Social and Cultural Anthropology R. Jon McGee,Richard L. Warms,2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume *Theory in Social and Cultural Anthropology An Encyclopedia* Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader s Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader s Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion

[Perspectives on Africa](#) Roy Richard Grinker,Stephen C. Lubkemann,Christopher B. Steiner,2010-05-17 The second edition of *Perspectives on Africa A Reader in Culture History and Representation* is both an introduction to the

cultures of Africa and a history of the interpretations of those cultures Key essays explore the major issues and debates through a combination of classic articles and the newest research in the field Explores the dynamic processes by and through which scholars have described and understood African history and culture Includes selections from anthropologists historians philosophers and critics who collectively reveal the interpenetration of ideas and concepts within and across disciplines regions and historical periods Offers a combined focus on ethnography and theory giving students the means to link theory with data and perspective with practice Newly revised and updated edition of this popular text with 14 brand new chapters and two new sections Conflict and Violent Transformations and Development Governance and Globalization Anonymous Power Okechukwu Ibeanu,Israel 'Kelue Okoye,Ikenna Mike Alumona,Ernest Tooichi Aniche,2022-01-28 This book examines the structures and processes of political decision making and governance in Nigeria Since Nigeria returned to elected government in 1999 it has been observed that several factors account for the differences between the design of statutory structures and processes of political decision making and how they operate in reality In other words there are wide gaps between statutes and practice of political decision making However the nexus between the two remains largely understudied by political scientists Instinctively political scientists assume that informal influences in political decision making are aberrations episodic or temporary This book is designed to interrogate the nexus between the formal and non formal dimensions of the dynamics of political decision making in Nigeria and also provide evidence about the actual functioning of governmental structures in Nigeria The thesis of the book is that the non formal dimension of political decision making as evidenced in rising ethno political patronages religious sentiments clientelism and factionalism are interacting with formal decision making structures in ways that largely undermine the latter and by extension the democratic system The book pursues this thesis by examining the roles of actors and institutions including electoral choices made by voters legislations which perhaps is the most fundamental form of political decision making policies made by the executive and administration as well as decision making within political parties since parties are sites for articulating and aggregating issues on which decisions are to be made *Black Markets and Militants* Khalid Mustafa Medani,2022-09-08 An explanation of why youth join militant organizations and how informal networks influence the character and objectives of social movements **War of Visions** Francis M. Deng,2011-10-01 The civil war that has intermittently raged in the Sudan since independence in 1956 is according to Francis Deng a conflict of contrasting and seemingly incompatible identities in the Northern and Southern parts of the country Identity is seen as a function of how people identify themselves and are identified in racial ethnic cultural linguistic and religious terms The identity question related to how such concepts determine or influence participation and distribution in the political economic social and cultural life of the country War of Visions aims at shedding light on the anomalies of the identity conflict The competing models in the Sudan are the Arab Islamic mold of the North representing two thirds of the country in territory and population and the remaining Southern third which is indigenously African in race

ethnicity culture and religion with an educated Christianized elite But although the North is popularly defined as racially Arab the people are a hybrid of Arab and African elements with the African physical characteristics predominating in most tribal groups This configuration is the result of a historical process that stratified races cultures and religions and fostered a passing into the Arab Islamic mold that discriminated against the African race and cultures The outcome of this process is a polarization that is based more on myth than on the realities of the situation The identity crisis has been further complicated by the fact that Northerners want to fashion the country on the basis of their Arab Islamic identity while the South is decidedly resistant Francis Deng presents three alternative approaches to the identity crisis First he argues that by bringing to the surface the realities of the African elements of identity in the North thereby revealing characteristics shared by all Sudanese a new basis for the creation of a common identity could be established that fosters equitable

Post-Conflict Security in South Sudan Nyambura Wambugu, 2019-07-25 Just eight years after the signing of the Comprehensive Peace Agreement CPA and two years after gaining independence the world's newest nation state descended once more into violence and civil war Why have policies of liberal peacebuilding failed to bring lasting stability to the region And what now for South Sudan Nyambura Wambugu an academic with more than ten years practical advisory and policymaking experience adopts a holistic and multi thematic approach to answer these crucial questions Rooting her analysis as deeply as the initial militarisation of Sudan in the 1950s Wambugu considers the complex and overlapping issues that have afflicted the region since 2005 In the process Wambugu demonstrates the failure of the billions of dollars spent on liberal peacebuilding and elucidates the possibility of demilitarisation as a lasting and sustainable alternative Such issues are common in post conflict states and the book therefore acts as a case study for better understanding the deeply entrenched causes of instability and identifying the most sustainable paths to peace This meticulously researched account is essential reading for all students researchers and policymakers working on post conflict societies
