The Active And Passive Forces Of Nature

Friedrich Schiller

The Active And Passive Forces Of Nature:

Leibniz and the Natural World Pauline Phemister, 2006-03-30 In the present book Pauline Phemister argues against traditional Anglo American interpretations of Leibniz as an idealist who conceives ultimate reality as a plurality of mind like immaterial beings and for whom physical bodies are ultimately unreal and our perceptions of them illusory. Re-reading the texts without the prior assumption of idealism allows the more material aspects of Leibniz's metaphysics to emerge. Leibniz is found to advance a synthesis of idealism and materialism. His ontology posits indivisible living animal-like corporeal substances as the real metaphysical constituents of the universe. His epistemology combines sense experience and reason and his ethics fuses confused perceptions and insensible appetites with distinct perceptions and rational choice. In the light of his sustained commitment to the reality of bodies, Phemister re-examines his dynamics, the doctrine of pre-established harmony and his views on freedom. The image of Leibniz as a rationalist philosopher who values activity and reason over passivity and sense experience is replaced by the one of a philosopher who recognises that in the created world there can only be activity if there is also passivity, minds, souls and forms if there is also matter, good if there is evil, perfection if there is imperfection.

De Almeida explores the four primary concerns of Romantic medicine: the physician's task, the meaning of life, the prescription of disease and health, and the evolution of matter and mind, and reveals their expression in Keats's poetry and thought. By delineating a distinct but unknown era in the history of medicine, charting the poet's milieu within this age and providing close reading of his poems in these contexts, *Romantic Medicine and John Keats* illustrates the interdisciplinary bonds between the two healing arts of the Romantic period: medicine and poetry.
