Ponce and the Guitar Corazón Otero, 1994 The Natural Classical Guitar Lee F. Ryan, 1991 *The Physics of Musical Instruments* Neville H. Fletcher, Thomas D. Rossing, 2013-11-09 When we wrote the first edition of this book we directed our presentation to the reader with a compelling interest in musical instruments who has a reasonable grasp of physics and who is not frightened by a little mathematics We are delighted to find how many such people there are The opportunity afforded by the preparation of this second edition has allowed us to bring our discussion up to date by including those new insights that have arisen from the work of many dedicated researchers over the past decade We have also taken the opportunity to revise our presentation of some aspects of the subject to make it more general and we hope more immediately accessible We have of course corrected any errors that have come to our attention and we express our thanks to those friends who pointed out such defects in the early printings of the first edition We hope that this book will continue to serve as a guide both to those undertaking research in the field and to those who simply have a deep interest in the subject June 1991 N H F and T D R **Flute, Accordion or Clarinet?** Dawn Loombe, Jo Tomlinson, Amelia Oldfield, 2015-04-21 Music therapists are trained to use their first study instrument in clinical practice yet existing literature focuses almost exclusively on the use of piano basic percussion and voice This illuminating book brings together international music therapists who use a diverse range of musical instruments in their clinical work the clarinet the piano accordion the flute the cello the trumpet and flugelhorn the bassoon the violin the

[Critical Theory, Cultural Practice and Musical Performance](#) Kevin Dawe, 2017-07-05 In *The New Guitarscape* Kevin Dawe argues for a re-assessment of guitar studies in the light of more recent musical social cultural and technological developments that have taken place around the instrument The author considers that a detailed study of the guitar in both contemporary and cross cultural perspectives is now absolutely essential and that such a study must also include discussion of a wide range of theoretical issues literature musical cultures and technologies as they come to bear upon the instrument Dawe presents a synthesis of previous work on the guitar but also expands the terms by which the guitar might be studied Moreover in order to understand the properties and potential of the guitar as an agent of music culture and society the author draws from studies in science and technology design theory material culture cognition sensual culture gender and sexuality power and agency ethnography real and virtual and globalization Dawe presents the guitar as an instrument of scientific investigation and part of the technology of globalization created and disseminated through corporate culture and cottage industry held close to the body but taken away from the body in cyberspace and involved in an enormous variety of cultural interactions and political exchanges in many different contexts around the world In an effort to understand the significance and meaning of the guitar in the lives of those who may be seen to be closest to it as well as providing a critically informed discussion of various approaches to guitar performance technologies and techniques the book includes discussion of the work of a wide range of guitarists including Robert Fripp Kamala Shankar Newton Faulkner Lionel Loueke Sharon Isbin Steve Vai Bob Brozman Kaki King Fred Frith John 5 Jennifer Batten Guthrie Govan Dominic Frasca I Wayan Balawan Vicki Genfan and Hasan Cihatter [Making Master Guitars](#) Roy Courtnall, 1993-08-01 *Making Master Guitars* is a craftsman's handbook about the exciting and challenging pursuit of making classical guitars a craft that the author reveals to be

surprisingly accessible by following his instructions The book is unique in that it includes nine separate detailed plans of instruments constructed by internationally famous guitar makers The author has had the rare opportunity of examining these instruments in detail and has made many replicas of each one Superbly illustrated by Adrian Lucas Part one The Master Makers and their Guitars is devoted to separate chapters on each famous maker including Antonio de Torres Hermann Hauser Santos Hernandez y Aguado Ignacio Fleta Robert Bouchet Daniel Friederich and Jose Romanillos The reader will find historical information about the life of and influences on each makers as well as detailed sets of working drawings for their guitars Also included are rare photographs of the guitars Part two Workshop Tools and Materials provides essential information about the tools working environment and material needed by the guitar maker Part three Guitar Construction The Spanish Method comprises a step by step method of guitar construction illustrated by numerous photographs and drawings The method of making a guitar is presented with great clarity So that even the newcomer to this fascinating craft will be able to produce a superb instrument This book will be essential for the guitar maker and the historian providing as it does a unique record of the different methods of guitar design and strutting systems that have evolved since Antonio de Torres first defined the essential characteristics of the modern classical guitar in the 1850s
