Strange And Not So Strange:

Not So Strange Bedfellows Rob Imre, Jim Jose, 2014-08-11 At the intersection of politics and religion is a nexus of belief in doctrine and adherence to socio political cultural conventions Lines of communication and methods of belonging permeate both spheres enabling their respective participants especially the often self described true believers to bond and belong and most importantly to adhere to their various belief systems Traditionally this nexus has been approached from a standpoint that posits the idea of secularity as the governing principle The authors in this volume challenge this orthodoxy They examine a diverse range of historical and geographic locations involving markedly different religious and political movements They explore how nation states develop political religions how they actively promote a politics infused with religiosity and how they transfer symbols and meanings from one socio political construct to another Despite markedly different philosophical differences the contributors repudiate the currently dominant orthodoxies on the relationship between religion and politics They demonstrate that secular democracy is not radically separate from religion Nation states actively participate in the construction of this nexus even as they extol their commitment to secular values In so doing they demonstrate that secularity as it is currently understood remains deeply implicated in the nexus between religion and politics in the twenty first century

Historical Narratives Mariana Imaz-Sheinbaum, 2023-10-27 This book explains some of the psychological processes that go into narrative construction and why it is that we have so much variability of historical accounts about a single historical event A central focus of this book is how historians go from having unconnected units of data to having a coherent structured and organized flow of experiences The author argues that the way these connections are established responds to certain Gestalt psychological principles that allow us to understand not only how histories are constructed but also how this construction can be rather different depending on how these principles are applied To illustrate how these principles are present in histories the author analyzes classic historical writers such as Burckhardt Huizinga Vico and Marx As well as an explanation of why historical multiplicity happens the book also offers a way to evaluate different historical narratives about the same historical event To illustrate how the evaluative framework is at play the author analyzes two views about the so called discovery of America The first one explains what happens in 1492 by using the term discovery The second one uses the notion of invention to talk about the same set of circumstances The book provides an important epistemic tool to evaluate these different accounts one that can be applied not only to this case but also others This book appeals to scholars graduate students and upper level undergraduate students of history and philosophy In addition the book may also attract intellectuals

generally considered who are interested in how philosophy can inform and question historical practice
