By  
G. P. GOOCH, D.LITT., F.B.A.

HOW events and historians have dealt or ought to use their general, particularly in the field of foreign affairs, is the central theme of the two volumes, old and new, collected in this Volume.

The first two deal with the development of the European situation from the foundation of the Habsburgian Empire in 1550 to the outbreak of war in 1914, as revealed by the opening of the archives of the Great Powers, with special reference to the diplomacy of Bismarck, Crispien, Delcœur and Kautsky-Mackay.

The study discusses the vacillations of British foreign policy between the two world wars and its efforts to avert a third catastrophe.

The seventh is a study of the diplomacy of some of nations who have made history, from Russia, the Ming and Empires in the sixteenth century, to Japan and Mussolini.

The eighth analyses the ideology of the French Revolution, and discusses its far-reaching influence on other countries and on later times.

The ninth deals with the relations between private and public morality and reveals some of the practical strategies in foreign affairs.

The tenth summarizes the decisions of the watershed conference of the war as embodied in Bismarck and revised in the various international treaties of our own day.

## **Studies In Diplomacy Statecraft:**

**Studies in diplomacy and statecraft** George P. Gooch, 1969      *Studies in Diplomacy and Statecraft* T. G. Otte, 2022-03-30 The chapters in this edited volume individually and collectively pay homage to Erik Goldstein's contribution to contemporary scholarship in the fields of international history, diplomatic studies and international security. The book offers insights into the rich tapestry of past and present international relations with differing emphases on political, military and cultural aspects. While some of the chapters explore the twentieth century British foreign policy apparatus and the different networks of people at work within it, others examine the deeper intellectual and other currents that shaped trans-Atlantic ties in the nineteenth and twentieth centuries. Geopolitics in a historiographical perspective and with a focus on Europe, the Eastern Mediterranean and East Asia forms another important strand of this collection. All chapters explore periods of wider systemic change in international politics and thus offer reflections on the essential continuities and discontinuities in great power relations. The chapters in this book were originally published as a special issue of the journal *Diplomacy Statecraft*.

*Studies in Diplomacy and Statecraft* George Peabody Gooch, 1969      Diplomatic Theory from Machiavelli to Kissinger G. Berridge, M. Keens-Soper, T. Otte, 2001-03-23 This book offers an introductory guide for students to four centuries of diplomatic thought. Since diplomacy as we know it was created during the Renaissance in Italy, a number of major figures have reflected on the place of diplomacy in foreign affairs and the problems associated with its pursuit. These include statesmen, international lawyers and historians, most of whom had experience as diplomats of the first or second rank. This book examines the thought of some of the most important of them: from Niccolò Machiavelli in the early sixteenth century to Henry Kissinger in the late twentieth century.

*The Metamorphosis of War*, 2012-01-01 In the last few decades the practice, purpose and the very language of warfare have been radically transformed. This volume mobilizes the resources of a range of disciplines across the social sciences and humanities in combination with the insights of military practitioners to understand the metamorphosis of war.

China's Coercion of States in the Asia-Pacific Region Maximilian Ernst, 2025-02-11 This book explains why China chooses to coerce Asia Pacific regional states despite the risk of such actions creating a backlash and complicating its strategic calculus China s coercion of neighboring states often a variation of heavy informal economic sanctions combined with diplomatic pressure and gray zone coercive measures has been increasingly observable in the past decade It has become an important tool in China s foreign policy toolbox and is frequently used by Beijing to shape the security political environment of the Asia Pacific The book begins with an appreciation of China s complicated geopolitical exposition and an understanding that such coercion creates backlash since the target state will likely be alienated and pushed into closer security cooperation with the United States China s main geopolitical rival Through two in depth case studies of Chinese coercion targeting the Philippines and South Korea respectively the book demonstrates that first the reason China coerces is that the secondary state engages in actions that fundamentally threaten China s security interests and second it will coerce these states only if other policy options geared to change the secondary state s course of action have not worked Employing balance of power theory and particularly wedge

strategies the book solves a pertinent research question and improves our knowledge of contemporary security politics in the Asia Pacific This book will be of interest to students scholars and practitioners of Asia Pacific security Chinese foreign policy and international relations      **Theodore Roosevelt and the Art of American Power** William R.
