Linguistic Genocide or Superdiversity? Reetta Toivanen,Janne

Saarikivi,2016-07-26 Are we facing an immense wave of language death or a period of remarkable new linguistic variation Or both This book answers this question by analysing studies of language endangerment and loss along with those of language change revitalization and diversity Using case studies from Russia and the EU the authors compare historical language variation to that of the present day arguing that accelerated language extinction can be considered a result of colonization modernization and globalization but so too can many new creoles intertwined and mixed languages new ethnic identities new groups of urban dwellers or migrant groups all with their own distinct cultural traits The book therefore surmises that the linguistic heritage of today is simultaneously more endangered and more diverse than ever before

Language History and Linguistic Modelling Raymond Hickey,Stanislav Puppel,2010-12-14 This work presents a collection of some 130 contributions

covering a wide range of topics of interest to historical theoretical and applied linguistics alike A major theme is the development of English which is examined on several levels in the light of recent linguistic theory in various papers The geographical dimension is also treated extensively with papers on controversial aspects of a variety of studies as are topical linguistic matters from a more general perspective **Studies in Turkish as a Heritage Language** Fatih

Bayram,2020-11-15 Heritage language bilingualism refers to contexts where a minority language spoken at home is one of the first native language s of an individual who grows up and typically becomes dominant in the societal majority language Heritage language bilinguals often wind up with grammatical systems that differ in interesting ways from dominant native speakers growing up where their heritage language is the majority one Understanding the trajectories and outcomes of heritage language bilingual grammatical competence performance language usage patterns identities and more related topics sits at the core of many research programs across a wide array of theoretical paradigms The study of heritage language bilingualism has grown exponentially over the past two decades This expansion in interest has seen in parallel extensions in methodologies applied bridges built between closely related fields such as the study of language contact and linguistic attrition As is typical in linguistics not all languages are studied to the same degree The present volume showcases what Turkish as a heritage language brings to bear for key questions in the study of heritage language bilingualism and beyond In many ways Turkish is an ideal language to be studied because of its large diaspora across the world in particular Europe The papers in this volume are diverse from psycholinguistic to ethnographic to classroom based studies featuring Turkish as a heritage language Together they equal more than their subparts leading to the conclusion that understudied heritage languages like Turkish provide missing pieces to the puzzle of understanding the variables that give rise to the continuum of outcomes characteristic of heritage language speakers The Uralic Languages Daniel Abondolo,Riitta-Liisa
