Studies In Language And Linguistics:

Cognitive Exploration of Language and Linguistics René Dirven, Marjolyn Verspoor, 2004-01-01 Cognitive Exploration of Language and Linguistics is designed as a comprehensive introductory text for first and second year university students of language and linguistics. It provides a chapter on each of the more established areas in linguistics such as lexicology, morphology, syntax, phonetics and phonology, historical linguistics and language typology, and on some of the newer areas such as cross cultural semantics, pragmatics, text linguistics and contrastive linguistics. In each of these areas, language is explored as part of a cognitive system comprising perception, emotion, categorisation, abstraction, processes and reasoning. All these cognitive abilities may interact with language and be influenced by language. Thus the study of language in a sense becomes the study of the way we express and exchange ideas and thoughts. This Second Revised Edition is corrected, updated and expanded. Cognitive Exploration of Language and Linguistics is clearly presented and organized after having been tested in several courses in various countries. Includes exercises, solutions to be found on the Internet. *Sociolinguistic Studies in Language Contact* William Francis Mackey, Jacob Ornstein-Galicia, 1979 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing. **Current Issues in Chinese Linguistics** Hooi Ling Soh, Liang Tao, Yun Xiao, 2011-07-12 Chinese is the most commonly spoken language in the world and one of the very few contemporary languages whose history is documented in an unbroken tradition extending back to the second millennium. Compared with Western languages, Chinese has a typology with distinguished features in sound system, syntax and discourse that have a strong impact on Chinese linguistics studies and language learning. Drawing on theoretical models from formal and functional linguistics, discourse analysis, computer assisted corpus studies, language socialization and second language acquisition, this volume presents new advances and addresses a broad range of current issues in the study of Chinese linguistics with research studies that originated from the proceedings of the 21st North American Conference on Chinese Linguistics (NACCL 21). As globalization presses on, more and more people are interested in Chinese, its history, structure, research and new developments. This volume aims to be instrumental. Written in a coherent and structured style, each section is concentrated on a particular linguistic area.

and each chapter is self contained with a clear focus and theoretical framework It will be valuable to linguists educators administrators specialists teachers and students of Chinese as a native second heritage or foreign language
