psychiatric hospitalization but of the very premises of psychiatry itself and the basic institutions of society especially the family But are these notions accurate or rather distorted images created by Laing himself or by the media In this book which has emerged out of an Anglo Dutch conference held in June 1997 the realities of critical psychiatry are explored using comparisons and contrasts between the British and the Dutch experiences as a probe There were it turns out various distinct anti psychiatries indeed hardly anybody actually used that label about themselves and they played a role in the reform no less than the rejection of regular psychiatry

Challenging Psychiatry's Reliance on the Disease Model Digby Tantam, 2024-08-22 This volume critiques and challenges the use and promotion of the disease model in psychiatry arguing that its misconceived approach prevents the preferred disablement model from becoming the default method to understand mental health conditions including schizophrenia Featuring first hand experiences as well as qualitative and quantitative findings the book posits that mental illnesses are an expression of disablement not disease and that the alternative disablement approach already being applied in the psychiatry of neurodevelopmental disorders but applicable to mental illness too allows for greater dignity and autonomy for the patient collaboration between medical professionals a replacement of categorical approaches with more appropriate dimensional ones and a liberation from the restrictive idea of a cure The initial chapters of the book summarize the now overwhelming evidence that the disease model is flawed as is the simplistic materialism that psychiatry has built around the concept of the brain as a kind of standalone biological computer The later chapters consider the currently existent alternatives to the disease model and put forward the evidence for a psychiatry based on the person as described by the philosopher Heidegger among others This volume will appeal to researchers scholars and postgraduate students in clinical psychiatry mental health research and psychotherapy Psychologists and clinicians active in research or teaching in mental
