view of efficient causation or do we need to also take into account final causation It will be of interest to psychology students of either undergraduate or graduate level and of great use to those with no prior knowledge of philosophy Developing a Model of Islamic Psychology and Psychotherapy Abdallah Rothman, 2021-07-29 At a time when there is increasing need to offer psychotherapeutic approaches that accommodate clients religious and spiritual beliefs and acknowledge the potential for healing and growth offered by religious frameworks this book explores psychology from an Islamic paradigm and demonstrates how Islamic understandings of human nature the self and the soul can inform an Islamic psychotherapy Drawing on a qualitative grounded theory analysis of interviews with Islamic scholars and clinicians this unique volume distils complex religious concepts to reconcile Islamic theology with contemporary notions of psychology Chapters offer nuanced explanations of relevant Islamic tradition and theological sources consider how this relates to Western notions of psychotherapy and common misconceptions and draw uniquely on first hand data to develop a new theory of Islamic psychology This in turn informs an innovative and empirically driven model of practice that translates Islamic understandings of human psychology into a clinical framework for Islamic psychotherapy An outstanding scholarly contribution to the modern and emerging discipline of Islamic psychology this book makes a pioneering contribution to the integration of the Islamic sciences and clinical mental health practice It will be a key resource for scholars researchers and practicing clinicians with an interest in Islamic psychology and Muslim mental health as well as religion spirituality and psychology more broadly Mental Health Nursing Gylo (Julie) Hercelinskyj, Louise Alexander, 2019-07-30 Mental Health Nursing Applying Theory to Practice is a new Australian text combining a theoretical approach to mental health nursing with clinical reasoning and a practical framework for real life nursing situations Ideal for both clinical and theory mental health course units the text was developed with input from consumers and clinicians and includes the clinical manifestations impacts treatment and management of persons suffering from mental illness Chapters on suicide and self harm and Mental Health First Aid provide detailed coverage of these contemporary mental health issues while a chapter on mental state examination MSE comprehensively explores MSE in a style similar to a traditional psychiatry text and in the context of many different mental health conditions giving students multiple perspectives of presentations Critical thinking and review questions challenge students to apply theory to practice and pharmacology is discussed in each disorder chapter helping students to contextualise their learning With coverage of the Mental Health Act 2014 and criteria from the Diagnostic and Statistical Manual of Mental Disorders Fifth Edition DSM 5 integrated throughout the text equips students with a working understanding of major mental health disorders and the ability to work practically when engaging with persons suffering from mental illness New print versions of this book come with bonus online study tools on the CourseMate Express and Search Me Nursing platforms TOEFL iBT Pamela J.
