Study of the Earth John Francis White, 1965      **Study of the Earth** John Francis White, 1960      *Study of the Earth* John Francis White, 2017-10-25 Excerpt from Study of the Earth Readings in Geological Science We have reason to believe that the earth has been undergoing a long and complex development proceeding from a comparatively homogeneous and simple structure to one much more complex Some five billion years ago there was only a cloud of matter in the form of dust and gas Later an earth gradually evolved and still later oceans continents and a primitive atmosphere formed The first lifelike structure gradually developed eons ago from comparatively complex minerals And a human animal appeared only an instant ago in geologic time the improbable product of an incredibly long sequence of ancestral events which began with the appropriate sized cloud at a certain distance from a star such are the broad but imperfectly understood outlines of the modern evolutionary View of the world much of whose development has come through study of the earth About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**Mars On Earth: A Study Of The Qaidam Basin** Long Xiao, 2021-01-04 Mars has been extensively photographed by cameras and compositionally detected by spectrometers onboard orbiters on a global scale and explored in situ by landers and rovers at both local and outcrop scales in different locations The results have proved that the Martian surface is rich in Earth like geomorphologies and the study of terrestrial analogs to Mars has been listed as one of the highest priorities of Martian science With increasing new discoveries by in situ explorations Mars exploration has begun to enter the era of focusing on detailed analyses at regional to outcrop levels rather than global mapping Analog studies are playing a crucial role in this transition making this book which introduces the methodology and provides cases for readers essentially important Dozens of sites on Earth have been listed as analog targets for comparative study with the geomorphology geology geochemistry environment and habitability of Mars However due to the diversity of landforms and forming mechanisms and the long history of Mars no single analog site on Earth can be fully compared to Mars Nonetheless the Qaidam Basin has been listed as an unique Mars analog site for studying the red planet s geomorphology geology and environmental changes

particularly regarding the evolution of paleolakes on Mars This kind of setting has always been listed as a top priority for the search of life on Mars This book contains first hand information and on site images obtained by the work s contributing authors and is an essential read for anyone interested in Martian geomorphology and its evolution processes and history
