Resources in Education ,2000-10 [Analysis of Research in the Teaching of Mathematics](#) ,1963 *PISA, Power, and Policy* Heinz-Dieter Meyer, Aaron Benavot, 2013-05-13 Over the past ten years the PISA assessment has risen to strategic prominence in the international education policy discourse Sponsored organized and administered by the Organization for Economic Cooperation and Development OECD PISA seems well on its way to being institutionalized as the main engine in the global accountability regime The goal of this book is to problematize this development and PISA as an institution building force in global education It scrutinizes the role of PISA in the emerging regime of global educational governance and questions the presumption that the quality of a nation s school

system can be evaluated through a standardized assessment that is insensitive to the world's vast cultural and institutional diversity. The book raises the question of whether PISA's dominance in the global educational discourse runs the risk of engendering an unprecedented process of worldwide educational standardization for the sake of hitching schools more tightly to the bandwagon of economic efficiency while sacrificing their role to prepare students for independent thinking and civic participation.

Educating Migrant Children in Urban Public Schools in China Bo Hu, 2018-06-15 This book investigates the implementation of the education policy for migrant children, arguing that it has been selectively implemented while some policy themes have been effectively implemented; others have not. Four factors underlie this selective implementation: specificity of policy goals, funding for education, local incentives in an exam-oriented education system, and intergroup relationships between migrant and urban children.

Advanced Students' Knowledge of Vocabulary in a First and Second Language Monica Karlsson, 2022-10-19 This book offers a comprehensive investigation into advanced students' knowledge of vocabulary in their L1 and L2. As a cross-sectional study, it examines the quantitative aspects of students' vocabulary knowledge through parallel tests of upper secondary level vocabulary, specialised vocabulary, and advanced vocabulary in both their L1 and L2. It also primarily in qualitative terms investigates students' L1 and L2 knowledge of polysemous words, lexical fields of near-synonyms and false friends, knowledge of derivative forms, idioms, proverbs, idiomatically used prepositions, and multi-word verbs, offering insights into both the breadth and depth of students' L1 and L2 vocabulary knowledge. Finally, it considers the extent to which students' results can be attributed to differences between inferencing skills in their L1 and L2. In each subfield, the pedagogical implications of the findings are discussed. This book will be of interest to teachers and researchers focusing on the teaching and learning of vocabulary.
