**Introduction to Religious Studies** Harvey J. Sindima, 2012-07-10 In Introduction to Religious Studies Harvey J Sindima provides an unconventional approach to the study of world religions Often books and courses on religious studies focus on the major world religions This approach however frequently ignores other religious experiences such as those of various African groups as well as the indigenous people of the Americas and Australia These less widespread religions are commonly described in pejorative terms such as primitive religions or non literate religions Focusing solely on well known religions is an approach that impoverishes religious studies and deprives students of the enormous wealth of religious knowledge of the world Introduction to Religious Studies pulls together the diverse religious experience of Africans Native Americans and the indigenous peoples of Australia in order to provide a comprehensive introduction to the study of

religion and broaden the horizons of religious studies students Under each theme or topic examples are drawn from religions of salvation as well as African and Native American religious traditions This book provides students with a deep wide and very rich introduction to religious studies

**Pulpit and Table** Howard G. Hageman, 2004-07-07 Although liturgical tradition in Reformed churches is a frequently probed subject information in certain aspects of the field is limited To alleviate this situation Dr Hageman places major emphasis in this book on some lesser known areas of Reformed worship At the same time he touches on highlights of Reformed liturgical history particularly the relative significance of sermon and

sacrament The importance of Zurich's contribution to Reformed tradition is comparatively unrecognized As Dr Hageman states Know it or not down to relatively recent times the Reformed churches have practically speaking acknowledged Zwingli as their liturgical master This he attributes in part to the fact that when Calvin came to Geneva five years after Zwingli's death he found the Zurich point of view too firmly entrenched there to be materially changed Additional territory unfolds with an examination of the dark age of Reformed Protestantism the period between the closing of the Westminster Assembly of Divines and the advent of Schleiermacher An impartial observer surveying the liturgical life of late eighteenth century Reformed churches could have justifiably concluded that it was nearly finished Pointing out that signs of recovery were already visible the author notes that these churches were on the verge of a liturgical development that was to prove more productive than any in their history Dr Hageman concludes with a discussion of theories which should undergird and test any liturgical developments in Reformed churches A primary factor here is the principle that pulpit and table are inseparable parts of a single whole He emphasizes however that if the Reformed churches really understand their position they have every reason for being liturgically fresh and creative Their liturgy must seek to establish models not rigid requirements Concise yet comprehensive this treatment of liturgical history is valuable for pastors and students of church history Concerned laymen including organists choir directors and choir members will find it a useful aid in understanding worship patterns of Reformed churches

Muthesius two earlier ground breaking volumes in the field of silk as material culture Studies in Byzantine and Islamic Silk Weaving and Studies in Silk in Byzantium The publication highlights the fact that similar patterns of selection were at work in the acquisition of silks by secular and ecclesiastical bodies These patterns of selection were governed not only by fashions of the time but by access to international trade routes leading to the Great Silk Road linking the Near East to the Mediterranean The surviving silks prove that Mediterranean Near Eastern silk trade flourished continuously and for centuries prior to the thirteenth century contrary to what has previously widely been assumed It also highlights the crucial role of the Caucasian silk routes in accessing the Great Silk Road in the early period and the contribution of Georgian and Armenian silk weaving after the thirteenth century Above all the book demonstrates how important it is to assess the impact of Near Eastern silk manufacture and distribution in relation to Byzantine and Islamic Mediterranean silk production and trade
