The Expository Times James Hastings, Ann Wilson Hastings, Edward Hastings, 1907

The Study of Nature and the Vision of God with Other Essays in Philosophy George John Blewett, 2017-04-04 From the INTRODUCTORY When some great Christian kingdom has along its borders no rest from war many young citizens the lion being still supreme in them¹ can recognise but one service of the state The watch upon the frontier with its discipline of arms and its incessant energies of defense and attack is to them at once the duty of a man and the meaning of citizenship and the ideal life But the years bring a graver wisdom the man who went out eagerly to the tented field if he has retained the clear sense of devotion to the state and has not become merely subdued to the trade of war comes more and more to see that great as is his present service to the state there is another quieter and greater The

ultimate strength of the state lies other where in patient processes and structures of industry and commerce and legislation in unnumbered school rooms in those ancient houses where learning is cherished for its own sake and for their own sake the sciences are cultivated and out of piety the memory of far off benefactors is kept alive above all in the relations dear of the homes with their charities of father son and brother and their establishment in uprightness and integrity of the characters of those who presently are to do the world s work and shape the world s life and in those companions of the homes without which homes are scarcely homes at all the parish churches that with sacraments and holy observances and the making of habitual prayer lie close to our mortal life from its beginning to its close parish churches where the vows of baptism are made for little children and with Morning Prayer and Evensong the growing life is reminded day by day of the heavenly glory which is its end and to each relationship of life with all that is in it of labour or sacred promise or discipline of grief there is brought by solemn offices the assistance of the heavenly grace and all at last the young with the old the poor side by side with the great lay themselves down together to their sleep in the shadow of the ancient walls In these things is the strength and true life of the state nay these tilings are the state and to them the man upon the frontier if he is a man indeed and the times are not too grim makes soon or late his way leaving the vigil upon the border to the younger men with whom the inward and spiritual voices of the rational sOul have not yet come to mastery and the call of the trumpet remains the one voice of duty

Reconstructing a Christian Theology of Nature Anna Case-Winters,2007 This book takes the current criticism of Christian tradition to heart and invites a reconsideration of the problematic elements its desacralization of nature its preoccupation with the human being to the neglect of the rest of nature its dualisms and elevation of the spiritual over material reality and its habit of ignoring or resisting scientific understandings of the natural world Christian Thought ,1916 **The Spectator** ,1908 A weekly review of politics literature theology and art The Raw and the Cooked: Mythologies of Nature in American Romanticism Viorica PATEA,2014-05-29 Natural Visions Finis Dunaway,2016-12-20

Walden Pond The Grand Canyon Yosemite National Park Throughout the twentieth century photographers and filmmakers created unforgettable images of these and other American natural treasures Many of these images including the work of Ansel Adams continue to occupy a prominent place in the American imagination Making these representations though was more than a purely aesthetic project In fact portraying majestic scenes and threatened places galvanized concern for the environment and its protection Natural Visions documents through images the history of environmental reform from the Progressive era to the first Earth Day celebration in 1970 showing the crucial role the camera played in the development of the conservation movement In Natural Visions Finis Dunaway tells the story of how visual imagery such as wilderness photographs New Deal documentary films and Sierra Club coffee table books shaped modern perceptions of the natural world By examining the relationship between the camera and environmental politics through detailed studies of key artists and activists Dunaway captures the emotional and spiritual meaning that became associated with the American landscape

Throughout the book he reveals how photographers and filmmakers adapted longstanding traditions in American culture the Puritan jeremiad the romantic sublime and the frontier myth to literally picture nature as a place of grace for the individual and the nation Beautifully illustrated with photographs by Ansel Adams Eliot Porter and a host of other artists Natural Visions will appeal to a wide range of readers interested in American cultural history the visual arts and environmentalism

The Institute Tie ,1916 **The Book of Nature in Early Modern and Modern History** Klaas van Berkel,Arie Johan Vanderjagt,2006 From 22 25 May 2002 the University of Groningen hosted an international conference on The Book of Nature Continuity and change in European and American attitudes towards the natural world From Antiquity down to our own time theologians philosophers and scientists have often compared nature to a book which might under the right circumstances be read and interpreted in order to come closer to the Author of nature God The reading of this book was not regarded as mere idle curiosity but it was seen as leading to a deeper understanding of God s wisdom and power and it culturally legitimated and promoted a positive attitude towards nature and its study A selection of the papers which were delivered at the conference has been edited in two volumes The first book was published as The Book of Nature in Antiquity and the Middle Ages this second volume is devoted to the history of that concept after the Middle Ages *God and Nature* Curtis L. Thompson,Joyce M. Cuff,2012-03-29 Two scholars who embrace contemporary insights from science and religion give shape to a compelling account of God s relation to nature Celebrating Nature by Faith H. Paul Santmire,2020-09-09 Sometimes it is helpful to take one step backward in order to take two steps forward In this insightful volume H Paul Santmire draws on his long standing and widely recognized engagement with ecological theology to propose that the traditions of the Protestant Reformation rightly read offer rich resources today for those who are struggling to move forward to respond theologically to the crisis of a planet in peril and thereby to celebrate nature by faith The Morning Star and Free Baptist ,1904
