country to the present day a period covering more than three centuries the former province has been often visited by whites but the remoteness of Tusayan and the arid and forbidding character of its surroundings have caused its more complete isolation The architecture of this district exhibits a close adherence to aboriginal practices still bears the marked impress of its development under the exacting conditions of an arid environment and is but slowly yielding to the influence of foreign ideas The present study of the architecture of Tusayan and Cibola embraces all of the inhabited pueblos of those provinces and includes a number of the ruins traditionally connected with them It will be observed by reference to the map that the area embraced in these provinces comprises but a small portion of the vast region over which pueblo culture once extended

Charles Adams, 2016-12-01 Beginning sometime in the thirteenth century people from the Hopi Mesas established a cluster of villages to the south along the Little Colorado River They were attracted by the river's resources and the region's ideal conditions for growing cotton By the late 1300s these Homol'ovi villages were the center of a robust trade in cotton among many clusters of villages near or on the southern Colorado Plateau and were involved in the beginning of katsina religion among Hopi people Charles Adams has directed fifteen years of research at these sites for the Arizona State Museum including excavations in five of the seven primary Homol'ovi villages and in other villages predating them Through this research he concludes that the founders of these settlements were Hopis who sought to protect their territory from migrating groups elsewhere in the Pueblo world This book summarizes that

research and broadens our understanding of the relationship of Homol ovi to ancient and modern Hopi people Each Homol ovi village had a unique history of establishment growth sociopolitical organization length of occupation and abandonment and although the villages shared much in the way of material culture their size and configuration were tremendously varied By comparing Homol ovi research to information from projects on other settlements in the area Adams has been able to reconstruct a provocative history of the Homol ovi cluster that includes relationships among the individual villages and their relationships to nearby clusters He shows that social organization within villages is apparent by the number and variety of ritual structures while political organization among villages is indicated by the need for cooperation to share water for irrigation and by the exchange of such materials as pottery obsidian and ground stone Adams advances several important theories about why Homol ovi was founded where and when it was who its founders were and the importance of cotton in making Homol ovi an important center of trade in the 1300s He also considers why Pueblo settlements suddenly became so large addressing theoretical issues pertaining to multiple settlements and the rise of enormous villages containing more than 1 000 rooms Homol ovi is a rich work of synthesis and interpretation that will be important for anyone with an interest in Southwest archaeology Arizona history or Hopi culture By considering the settlement trajectory of an entire cluster of sites it will also prove valuable to archaeologists worldwide
