The Dynamics of Murder R. Barri Flowers, 2012-11-26 In recent years, there has been a surge in school shootings, workplace homicides, hate violence, and deadly terrorist attacks in the United States. This has resulted in a greater focus on homicidal behavior, its antecedents, ways to recognize warning signs of at-risk victims and offenders, and preventive measures. It has also led to increased efforts by lawmakers to create and pass tough crime legislation, as well as improved federal, state, and local law enforcement response to murder and other violent crimes. *The Dynamics of Murder: Kill or Be Killed* is a multifaceted probe of murder offenses, offenders, victims, and characteristics of homicide in American society. This book breaks new ground in homicide studies by examining issues generally ignored or neglected among researchers. Topics include murders occurring in the workplace and in schools, those perpetrated by gangs and terrorists, those incited by bias, and intimate and intrafamilial murders. The book discusses sexual killers, serial and mass murderers, and suicide. It also examines psychological and sociological theories on murder and violence, as well as the increasing role the Internet plays in these crimes. Case studies of actual murderers are included, including serial killers Gerald and Charlene Gallego, mass murderer Byran Koji Uyesugi, the murder-suicide case of Sahel Kazemi, and the intrafamilial murders committed by Charles Stuart and Sarah Marie Johnson. A comprehensive exploration of the crime of murder in American society, this fascinating study is an essential resource for researchers, criminologists, and other professionals in a wide range of disciplines.

Why Some Politicians Are More Dangerous Than Others James Gilligan, 2013-05-20 Politicians and the political process even in ostensibly democratic countries can be deadly James Gilligan has discovered a devastating truth that has been hiding in plain sight for the past century namely that when America s conservative party the Republicans have gained the presidency the country has repeatedly suffered from epidemics of violent death Rates of both suicide and homicide have sky rocketed The reasons are all

too obvious rates of every form of social and economic distress inequality and loss unemployment recessions poverty bankruptcy homelessness also ballooned to epidemic proportions When that has happened those in the population who were most vulnerable have snapped with tragic consequences for everyone These epidemics of lethal violence have then remained at epidemic levels until the more liberal party the Democrats regained the White House and dramatically reduced the amount of deadly violence by diminishing the magnitude of the economic distress that had been causing it This pattern has been documented since 1900 when the US government first began compiling vital statistics on a yearly basis and yet it has not been noticed by anyone until now except with regard to suicide in the UK and Australia where a similar pattern has been described This book is a path breaking account of a phenomenon that has implications for every country that presumes to call itself democratic civilized and humane and for all those citizens voters and political thinkers who would like to help their country move in that direction

The ^ANext Frontier David T Johnson,Franklin

E Zimring, 2009-02-02 Today two thirds of the world's nations have abolished the death penalty either officially or in practice due mainly to the campaign to end state executions led by Western European nations Will this success spread to Asia where over 95 percent of executions now occur Do Asian values and traditions support capital punishment or will development and democratization end executions in the world's most rapidly developing region David T Johnson an expert on law and society in Asia and Franklin E Zimring a senior authority on capital punishment combine detailed case studies of the death penalty in Asian nations with cross national comparisons to identify the critical factors for the future of Asian death penalty policy The clear trend is away from reliance on state execution and many nations with death penalties in their criminal codes rarely use it Only the hard line authoritarian regimes of China Vietnam Singapore and North Korea execute with any frequency and when authoritarian states experience democratic reforms the rate of executions drops sharply as in Taiwan and South Korea Debunking the myth of Asian values Johnson and Zimring demonstrate that politics rather than culture or tradition is the major obstacle to the end of executions Carefully researched and full of valuable lessons The Next Frontier is the authoritative resource on the death penalty in Asia for scholars policymakers and advocates around the world

Parricide and Violence against Parents Marianna Muravyeva, Phillip Shon, Raisa Maria Toivo, 2020-12-30 Parricide and Violence Against Parents takes a historical and criminological approach to the research on parricide and violence against parents placing the research in the context of social development from the 1500s to contemporary society and giving a global overview and comparison The book examines parricide and violence against parents as historically and culturally sensitive phenomena It offers evidence on a seemingly rare subject from different eras areas and cultures and then uses the cross disciplinary data to produce a new systematic insight for the reader Case studies shift the discussion from the contemporary focus on adolescent to parent abuse to examining the sources of conflict during life cycles of parents and their offspring A historical approach illuminates the variations in conflicts between parents and their offspring that are shaped by the life stages of the victims and offenders themselves across time The book argues that parental authority has been marked by property ownership and tax paying responsibilities throughout history The continued possession of property resulted in power the reluctance to part with it becoming a notable source of conflict across generations within families Parental authority was protected by means of heavy penalties and punishments and didactic teachings in almost every society at every stage of historical development It was also challenged constantly by children as a part of their coming into adulthood The abuse of parents has often been connected to situations where adult children were prevented from gaining the amount of independence appropriate to their position in life This led to disputes over authority and the legitimate grounds for that authority Offering an insight into complicated and interconnected histories of generational conflicts and how they affect modern families in different parts of the world this book will be of great interest to students and scholars of criminology history of crime history of the family family violence homicide studies gender studies history of emotions political violence
