Handbook of Cultural Health Psychology Shahe S. Kazarian, David R. Evans, 2001-08-24 The Handbook of Cultural Health Psychology discusses the influence of cultural beliefs, norms, and values on illness, health, and health care. The major health problems that are confronting the global village are discussed from a cultural perspective. These include heart disease, cancer, HIV/AIDS, pain, and suicide. The cultural beliefs and practices of several cultural groups and the unique health issues confronting them are also presented. The cultural groups discussed include Latinos, Aboriginal peoples, people of African heritage, and South Asians. The handbook contributes to increased personal awareness of the role of culture in health and illness, behavior, and to the delivery of culturally relevant health care services. Many societies are culturally diverse or becoming so; the cultural approach is a unique and necessary addition to the health psychology area. Satisfies the ever-increasing appetite of health psychologists for cultural issues in health and women's health issues. Major and global health concerns are covered, including heart disease, cancer, HIV/AIDS, pain, suicide, and health promotion. The health beliefs and practices of Latinos, people of African heritage, Aboriginal peoples, and South Asians are presented without stereotyping these cultural groups. The handbook provides excellent information for health care researchers, practitioners, students, and policy makers in culturally pluralistic communities. References are thorough and completely up to date.

[The Oxford Handbook of Chinese Cinemas](#) Carlos Rojas, Eileen Chow, 2013-04-25 What does it mean for a cinematic work to be Chinese? Does it refer specifically to a work's subject, or does it also reflect considerations of language, ethnicity, nationality, ideology, or political orientation? Such questions make any single approach to a vast field like Chinese cinema difficult at best. Accordingly, *The Oxford Handbook of Chinese Cinemas* situates the term more broadly among various different phases, genres, and distinct national configurations.

while taking care to address the consequences of grouping together so many disparate histories under a single banner Offering both a platform for cross disciplinary dialogue and a mapping of Chinese cinema as an expanded field this Handbook presents thirty three essays by leading researchers and scholars intent on yielding new insights and new analyses using three different methodologies Chapters in Part I investigate the historical periodizations of the field through changing notions of national and political identity all the way from the industry s beginnings in the 1920s up to its current forms in contemporary Hong Kong Taiwan and the global diaspora Chapters in Part II feature studies centered on the field s taxonomical formalities including such topics as the role of the Chinese opera in technological innovation the political logic of the Maoist film and the psychoanalytic formula of the kung fu action film Finally in Part III focus is given to the structural elements that comprise a work s production distribution and reception to reveal the broader cinematic apparatuses within which these works are positioned Taken together the multipronged approach supports a wider platform beyond the geopolitical and linguistic limitations in existing scholarship Expertly edited to illustrate a representative set of up to date topics and approaches The Oxford Handbook of Chinese Cinemas provides a vital addition to a burgeoning field still in its formative stages
