**El suicidio** Émile Durkheim,1928      **Death in the City** Kathryn A. Sloan,2017-04-11 At the turn of the twentieth century many observers considered suicide to be a worldwide social problem that had reached epidemic proportions In Mexico City violent deaths in public spaces were commonplace in a city undergoing rapid modernization Crime rates mounted corpses piled up in the morgue and the media reported on sensational cases of murder and suicide More troublesome still a compelling death wish appeared to grip women and youth Drawing on a range of sources from judicial records to the popular press *Death in the City* investigates the cultural meanings of self destruction in modern Mexico The author examines responses to suicide and death and disproves the long held belief that Mexicans possess a cavalier attitude toward suffering

**To Die in Cuba** Louis A. Pérez Jr.,2012-12-01 For much of the nineteenth century and all of the twentieth the per capita rate of suicide in Cuba was the highest in Latin America and among the highest in the world a condition made all the more extraordinary in light of Cuba s historic ties to the Catholic church In this richly illustrated social and cultural history of suicide in Cuba Louis A Perez Jr explores the way suicide passed from the unthinkable to the unremarkable in Cuban society In a study that spans the experiences of enslaved Africans and indentured Chinese in the colony nationalists of the twentieth century republic and emigrants from Cuba to Florida following the 1959 revolution Perez finds that the act of suicide was loaded with meanings that changed over time Analyzing the social context of suicide he argues that in addition to confirming despair suicide sometimes served as a way to consecrate patriotism affirm personal agency or protest injustice The act was often seen by suicidal persons and their contemporaries as an entirely reasonable response to circumstances of affliction whether economic political or social Bringing an important historical perspective to the study of suicide Perez offers a valuable new understanding of the strategies with which vast numbers of people made their way through life if only to choose to end it *To Die in Cuba* ultimately tells as much about Cubans lives culture and society as it does about their self inflicted deaths

**TRASTORNOS BIPOLARES**, E. VIETA, 2000-12-19 **Usurping Suicide** Professor Suman Gupta, Milena Katsarska, Theodoros A. Spyros, Mike Hajimichael, 2017-08-15 Can an individual act of suicide be socially significant or does it present too many imponderable features? This book examines suicide like no other. Unconcerned with the individual dispositions that lead a person to commit such an act, *Usurping Suicide* focuses on the reception suicides have produced: their political, social and cultural implications. How does a particular act of suicide enable a collective significance to be attached to it? And what contextual circumstances predispose a politicised public response? From Mohamed Bouazizi's

self immolation during regime change in Tunisia to Dimitris Christoulas's public shooting at a time of increased political upheaval in Greece and beyond this remarkable work examines how the individuality of the act of suicide poses a disturbing symbolic conundrum for the dominant liberal order
