Information Technology Research, Innovation, and E-Government National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Computing and Communications Research to Enable Better Use of Information Technology in Government,2002-06-03 Governments have done much to leverage information technology to deploy e government services but much work remains before the vision of e government can be fully realized Information Technology Research Innovation and E government examines the emerging visions for e government the technologies required to implement them and approaches that can be taken to accelerate innovation and the transition of innovative information technologies from the laboratory to operational government systems

In many cases government can follow the private sector in designing and implementing IT based services But there are a number of areas where government requirements differ from those in the commercial world and in these areas government will need to act on its role as a demand leader Although researchers and government agencies may appear to by unlikely allies in this endeavor both groups have a shared interest in innovation and meeting future needs E government innovation will require addressing a broad array of issues including organization and policy as well as engineering practice and technology research and development and each of these issues is considered in the book *Handbook of Risk and Crisis Communication* Robert L. Heath,H. Dan O'Hair,2020-10-28 The Handbook of Risk and Crisis Communication explores the scope and purpose of risk and its counterpart crisis to facilitate the understanding of these issues from conceptual and strategic perspectives Recognizing that risk is a central feature of our daily lives found in relationships organizations governments the environment and a wide variety of interactions contributors to this volume explore such questions as What is likely to happen to whom and with what consequences To what extent can science and vigilance prevent or mitigate negative outcomes and What obligation do some segments of local national and global populations have to help other segments manage risks shedding light on the issues in the quest for definitive answers The Handbook offers a broad approach to the study of risk and crisis as joint concerns Chapters explore the reach of crisis and risk communication define and examine key constructs and parse the contexts of these vital areas As a whole the volume presents a comprehensive array of studies that highlight the standard principles and theories on both topics serving as the largest effort to date focused on engaging risk communication discussions in a comprehensive manner Now available in paperback the Handbook of Risk and Crisis Communication can be readily used in graduate coursework and individual research programs With perspectives from psychology sociology anthropology political science economics and communication the Handbook provides vital insights for all disciplines studying risk and is required reading for scholars and researchers investigating risk and crisis in various contexts Improving Disaster Management National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Committee on Using Information Technology to Enhance Disaster Management,2007-05-01 Information technology IT has the potential to play a critical role in managing natural and human made disasters Damage to communications infrastructure along with other communications problems exacerbated the difficulties in carrying out response and recovery efforts following Hurricane Katrina To assist government planning in this area the Congress in the E government Act of 2002 directed the Federal Emergency Management Agency FEMA to request the NRC to conduct a study on the application of IT to disaster management This report characterizes disaster management providing a framework for considering the range and nature of information and communication needs presents a vision of the potential for IT to improve disaster management provides an analysis of structural organizational and other non technical barriers to the acquisition adoption and effective use of IT in disaster and offers an outline of a research
