Sunken Gillnets William H. Nicholson, 1996-11      Alaska Shipwrecks 1750-2015 Captain Warren Good, Michael Burwell, 2018-07-29 ALASKA SHIPWRECKS 1750 2015 is an encyclopedic accounting of all shipwrecks and losses of life in the Alaska Marine environment Compiled and written by Captain Warren Good with research assistance and extensive consultation provided by maritime historian Michael Burwell this book is filled with a wealth of information for those interested in Alaska maritime history and the multitude of associated tragedies Included are details of all known wrecks including vessel information crew member and passenger names locations first hand descriptions of events and sources of all information In addition comprehensive comments by Captain Warren Good further elaborate on the location and disposition of many of the disasters      Bear Attacks, Dog Teams and a Sinking Boat Mike Sloan, 2021-03-03 Life is full of experiences These experiences can be useful windows in teaching us spiritual truths Jesus taught this way Often He used physical examples to illustrate spiritual truths These short devotionals use life experiences not only to connect the physical to the spiritual but to encourage the reader to finish the climb the spiritual life journey that all Christians are on It s similar to climbing a mountain The goal is the summit It s similar to a race on a track The goal is to finish There is a lot involved a lot that happens between the start and the finish This book includes the principles and methods learned in my journey It includes problems to be aware of and common mistakes to avoid along the way There are also certain methods that will be helpful for life These are the result of 40 years of missionary and pastoral service We are all on a journey The journey has its ups and downs but there is a start and there is a finish We want to finish well My own life adventures and experiences have become illustrations with a message A message that seeks to point us upwards and onwards in the life journey we are on These 33 stories are wisdom lessons learned during my life of adventures from climbing canoeing guiding in Alaska living in a remote village in Nepal basically from 40 years of ministry They are designed so readers can understand spiritual principles The lessons are a great tool for group discussion or for the person who is busy and enjoys a short daily challenge using real experiences as a window into spiritual principles      Ocean Recovery Ray Hilborn, Ulrike Hilborn, 2019-06-27 Over the last two decades the scientific and popular media have been bombarded by gloom and doom stories of the future of fisheries the status of fish stocks and the impact of fishing on marine ecosystems Dozens of certification and labeling schemes have emerged to advise consumers on what seafood is sustainable In recent years an opposing narrative has emerged emphasizing the success of fisheries management in many places the increasing abundance of fish stocks in those places and the prescription for sustainable fisheries However there has been no comprehensive survey of what really constitutes sustainability in fisheries fish stock status success and failures of management and consideration of the impacts of fishing on marine ecosystems This book will explore very different perspectives on sustainability and bring together the data from a large number of studies to show where fish stocks are increasing where they are declining the consequences of alternative

fisheries management regimes and what is known about a range of fisheries issues such as the impacts of trawling on marine ecosystems Ocean Recovery is aimed principally at a general audience that is already interested in fisheries but seeks both a deeper understanding of what is known about specific issues and an impartial presentation of all the data rather than selected examples used to justify a particular perspective or agenda It will also appeal to the scientific community eager to know more about marine fisheries and fishing data and serve as the basis for graduate seminars on the sustainability of natural resources
