,1953 **Science for All** Peter J. Bowler,2009-10-15 Recent scholarship has revealed that pioneering Victorian scientists endeavored through voluminous writing to raise public interest in science and its implications But it has generally been assumed that once science became a profession around the turn of the century this new generation of scientists turned its collective back on public outreach Science for All debunks this apocryphal notion Peter J Bowler surveys the books serial works magazines and newspapers published between 1900 and the outbreak of World War II to show that practicing scientists were very active in writing about their work for a general readership Science for All argues that the social environment of early twentieth century Britain created a substantial market for science books and magazines aimed at those who had benefited from better secondary education but could not access higher learning Scientists found it easy and profitable to write for this audience Bowler reveals and because their work was seen as educational they faced no hostility from their peers But when admission to colleges and universities became more accessible in the 1960s this market diminished and professional scientists began to lose interest in writing at the nonspecialist level Eagerly anticipated by scholars of scientific engagement throughout the ages Science for All sheds light on our own era and the continuing tension between science and public understanding New Technical Books ,1956 **Adult Catalog: Subjects** Los Angeles County Public Library,1970 **The National Union Catalog, Pre-1956 Imprints** ,1968 **Author Catalogue of Printed Books in European Languages** National Library (India),1985 *The House of Sciences* Ekmeleddin İhsanoğlu,2019 The book examines the founding of a western institution a university in the Ottoman Empire a cultural environment wholly different from that of its place of origin in Western Europe *Proceedings, Abstracts of Lectures and a Brief Report of the Discussions of the National Teachers' Association, the National Association of School Superintendents and the American Normal School Association* National Education Association of the United States,1904 **The Vienna Circle in Czechoslovakia** Radek Schuster,2020-02-24 This book explores the remarkable interconnections of the Czechoslovak environment and the work and legacy of the Vienna Circle on the philosophical scientific and artistic level The Czech lands and later Czechoslovakia were the living and working space for the predecessors and catalysts for Logical Empiricism such as Bernard Bolzano Ernst Mach and Albert Einstein along with key figures in the Vienna Circle such as Philipp Frank and Rudolf Carnap Moreover Prague hosted important academic events in which Logical Empiricism was presented to the public such as the September 1929 1st Conference on the Epistemology of the Exact Sciences which launched the key manifesto The Vienna Circle The Scientific Conception of the World In addition this book investigates both the positive and negative receptions of Logical Empiricism within Czech and Slovak intellectual circles The volume features a selection of contributions to the international conference The Vienna Circle in Czechoslovakia held in Pilsen Czech Republic in February 2015 These essays are supplemented by two texts of vivid personal memoirs by Nina Holton and Ladislav Tondl The book is of interest to scholars and researchers interested in the history of philosophy and science in central Europe and the philosophy of science

Between the Pigeonholes Alison Falby,2020-12-15 Aldous Huxley described Gerald Heard as that rare being a learned man who made his mental home on the vacant spaces between the pigeonholes Heard s off beat interests made him a cultural and intellectual pioneer on both sides of the Atlantic in the middle decades of the twentieth century Despite accolades from such figures as E M Forster who characterized him as one of the most penetrating minds in England and Christopher Isherwood who described him upon his death as one of the few great magic mythmakers and revealers of life s wonder Heard is largely unknown today Between the Pigeonholes is the first published full length study of Gerald Heard Alison Falby examines Heard s ideas and contexts in interwar Britain and postwar America demonstrating his significance in several important twentieth century movements These movements include popular science and psychology psychical research Eastern spirituality pacifism cooperativism and Californian counter culture All of Heard s involvements expressed his desire to convey religious ideas in the modern languages of biological social and physical science Falby also traces Heard s shifting political leanings from left liberal in the early 1930s to libertarian in the early 1960s She finds that his modernist theological approach conventionally associated with liberal religion and politics provided spiritual fodder for those on both the Left and the Right Isherwood and W H Auden on the one hand and Clare Boothe Luce and Spiritual Mobilization on the other Using Heard as a prism through which to examine popular ideas Falby shows that the twentieth century contained much political and religious heterogeneity This heterogeneity illustrates the diverse and overlapping roots of both liberal religion and conservative politics in the twenty first century **Catalogue** Lake Forest College,1885
