Stranger and Friend Hortense Powdermaker, 1966 For fieldworkers in the social sciences **The Nature, Design, and General Rules of the Stranger's Friend Society, as Established in Dublin, 1790** Stranger's Friend Society (Dublin, Ireland), 1799 Culture Care Diversity and Universality Madeleine M. Leininger, Marilyn R. McFarland, 2006 With new research on diverse cultures this new edition has been thoroughly updated It offers an introduction to the Sunrise Enabler and the Ethnonursing Research Method important tools in providing culturally congruent competent safe care in a multicultural environment Learning in Social Context: The Nature and Profit of Living in Groups for Development Ildikó Király, David Buttelmann, 2017-05-25 One of the distinctive features of humans is their unique sociality Humans live in organized societies that are characterized by a high level of interdependence of group members in various aspects of life ranging from the economic phenomenon of labour division to providing emotional support to others Under these circumstances the capacity to track social connections within and between groups has great adaptive value in managing everyday life We may understand the importance and adaptive value of tracking the scope of culturally shared knowledge if we consider the importance of cultural norms in guiding behaviour To become a competent member of their cultural group one must be able to conform to the group's specific behavioural norms and to accumulate culturally shared knowledge Acquiring this knowledge is essential for successful social interactions In contrast to current dominant explanatory theories emphasizing that social category formation is simply rooted in humans need to belong and affiliate with a group the aim of this e book is to provide evidence that in addition to its affiliative role children form social categories for epistemic purposes We show that children use specific cues like kinship patterns of resource allocation and consensus to understand group cohesion Section 1 Once children figured out who is in group and who is out group they show a significant in group bias in attention acting and learning Section 2 Yet this in group bias can be attenuated by induced synchronous behavior Section 3
