### **Students In Discord Adolescents With Emotional And Behavioral Disorders:**

*Students in Discord* C. Robin Boucher, 1999-03-30 *Students in Discord* fills a void in the professional literature concerning adolescents with emotional and behavioral disorders by providing theoretical information about psychiatric and psychological diagnoses with practical information about actual public school students who show both externalizing and internalizing disorders In the process the book provides understanding about disorders in childhood and adolescence and enhances understanding of federal guidelines on emotional disturbance specifically those provided in the Individuals With Disabilities Education Act The author provides suggested educational strategies that represent behavioral psychological sociological and environmental models and that aim to both decrease undesirable behaviors and increase desirable ones Theoretical issues covering disorders related to personality disruptive behavior eating mood anxiety and development are illustrated by 57 adolescents whose feelings and behaviors are presented through anecdotal material direct quotes from them and their teachers life facts and student writings Additional perspectives are provided by comparing federal and practical definitional characteristics of emotional disturbance and discussing concerns about the inability of students with emotional and behavioral disorders to detach the inclusion of socially maladjusted students in the ED emotionally disturbed category and the interrelation of emotional and behavioral disorders

### **Issues in Web-Based Pedagogy** Robert A. Cole, 2000-06-30

There has been an explosion of Web based courses in higher education Aiming at an interdisciplinary audience the contributors draw upon diverse philosophical and empirical backgrounds to make claims about Web based pedagogy Among the points they raise is the concern that education is more easily commodified through Internet technologies implying that traditional faculty roles in teaching and research are at risk Moreover current understandings of what it means to be a teacher or a student are undergoing redefinition as a result of these new distance learning technologies The contributors note that Web based pedagogy is associated with sound instruction when particular strategies are adopted As a corollary this form of teaching is least effective when attempts are made to directly translate traditional styles of teaching Political social and economic interests are competing to shape the direction that online education will take The authors argue that opportunities exist for administrators and faculty to define the terms under which Web based learning will occur in their institutions

### **Developing Non-Hierarchical Leadership on Campus**

Shannon Faris, Kathleen McMahon, Charles Outcalt, 2000-10-30 Many problems that plague modern American society including disappearance of community decaying inner cities racial tensions environmental degradation declining civic engagement and the increasing ineffectiveness of government to name a few are in many respects problems of leadership Leadership means not only what elected and appointed public officials do but also the critically important civic work performed by those individual citizens who are actively engaged in making a positive difference in society Clearly one of the major problems with contemporary civic life in America is that too few of our citizens are actively engaged in efforts to effect positive social change Educators seldom

acknowledge higher education's possible contribution to these problems or the role that it might play in alleviating them. Colleges and universities provide rich opportunities for developing leaders through the curriculum and co-curriculum. Co-curricular experiences not only support and augment the students' formal classroom and curricular experience but can also create powerful learning opportunities for leadership development through collaborative group projects that serve the institution or the community. These projects can be implemented through service learning, residential living, community work, and student organizations. In the first section, Alexander W. Astin and Helen S. Astin, two of the most influential authors in education and co-principal investigators for the research team that devised the Social Change Model of Leadership Development, share their insights on the model they helped create. Also in this section, other leading theoreticians offer provocative and challenging insights into non-hierarchical leadership. The second section features case studies and other examples from the practical realm. Contributions come from a wide array of programs and institutions, from community colleges to Ivy League institutions to urban public universities. Because campuses are increasingly diverse, leadership programs must not only acknowledge but embrace the multiplicity of identities personified in their students. Accordingly, the next section offers essays and case studies on complex issues of intersection of leadership and identity. The book concludes with two chapters essential for those seeking to access leadership development: one focusing on the need for assessment, the other containing an account of the first ever instrument designed specifically to assess non-hierarchical leadership, written by the creator of this instrument.

*Handbook of Research on Emotional and Behavioral Disorders* Thomas W. Farmer, Maureen A. Conroy, Elizabeth M.Z. Farmer, Kevin S. Sutherland, 2020-03-26

The *Handbook of Research on Emotional and Behavioral Disorders* explores the factors necessary for successful implementation of interventions that foster productive relationships and ecologies to establish, reinforce, and sustain adaptive patterns of emotional and behavioral functioning across childhood and into adulthood. Although there has been a concerted focus on developing evidence-based programs and practices to support the needs of children and youth with emotional and behavioral disorders, there has been less emphasis on the developmental, social, and environmental factors that impact the implementation and effectiveness of these approaches. Chapters from leading experts tackle this complexity by drawing on a range of disciplines and perspectives, including special education, mental health services, school clinical and community psychology, social work, developmental psychology, and psychopathology, and prevention science. An essential resource for scholars and students interested in emotional and behavioral disorders, this volume crafts an essential framework to promote developmentally meaningful strategies for children and youth with even the most adverse experiences and intensive support needs.
