Handbook of Cognitive Linguistics and Second Language Acquisition Peter

Robinson, Nick C. Ellis, 2008 *The Handbook of Cognitive Linguistics and Second Language Acquisition* unifies the various theoretical and empirical strands within the burgeoning research field of cognitive linguistics. Additionally, it introduces and applies these basic concepts to the field of second language acquisition. The editorial team of Peter Robinson and Nick Ellis, both pioneers in cognitive linguistics, has assembled an astonishing group of well-known researchers to participate in this volume. As a handbook, it will be useful to researchers. The tutorial style of the chapters will make it useful to students in a variety of language-intensive disciplines, especially in second language acquisition. Second Language Acquisition Susan M. Gass, Larry Selinker, 2001 This book is a thorough revision of the highly successful text first published in 1994. The authors retain the multidisciplinary approach that presents research from linguistics, sociology, psychology, and education in a format designed for use in an introductory course for undergraduate or graduate students. The research is updated throughout, and there are new sections and chapters in this second edition as well. New chapters cover child language acquisition, first and second Universal Grammar, and instructed language learning. New sections address issues such as what data analysis doesn't show, replication of research findings, interlanguage transfer, multilingual acquisition, and transfer of the aspect hypothesis, general nativism, connectionist approaches, and implicit/explicit knowledge. Major updates include nonlanguage influences and the lexicon. The workbook *Second Language Learning Data Analysis* Second Edition makes an ideal accompaniment to the text. *An Introduction to Second Language Acquisition Research* Diane Larsen-Freeman, Michael H. Long, 2014-09-25 Understanding how people learn and fail to learn second and foreign languages is increasingly recognised as a critical social and psycholinguistic issue. Second languages are vitally important to diverse groups of people, ranging from refugees to college students facing foreign language requirements. This book provides a synthesis of empirical findings on second and foreign language learning by children and adults, emphasising the design and execution of appropriate research. *Second Language Acquisition Myths* Steven Brown, Jenifer Larson-Hall, 2012-03-15 This volume was conceived as a first book in SLA for advanced undergraduate or introductory master's courses that include education majors, foreign language education majors, and English majors. It is also an excellent resource for practicing teachers. Both the research and pedagogy in this book are based on the newest research in the field of second language acquisition. It is not the goal of this book to address every SLA theory or teach research methodology. It does, however, address the myths and questions that non-specialist teacher candidates have about language learning. Steven Brown is the co-author of the introductory applied linguistics textbook *Understanding Language: Structure, Interaction, and Variation* textbook and workbook. The myths challenged in this book are: Children learn languages quickly and easily while adults are ineffective in comparison. A true bilingual is someone who speaks two languages perfectly. You can acquire a language simply through listening or reading. Practice makes perfect. Language students learn and retain what they are taught. Language learners always benefit from correction. Individual differences are a major, perhaps the major, factor in SLA. Language acquisition is the individual acquisition of grammar.
