**Astronomy Across Cultures** Helaine Selin, 2012-12-06 Astronomy Across Cultures A History of Non Western Astronomy consists of essays dealing with the astronomical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Polynesian Egyptian and Tibetan astronomy among others the book includes essays on Sky Tales and Why We Tell Them and Astronomy and Prehistory and Astronomy and Astrology The essays address the connections between science and culture and relate astronomical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups *Tradition, Transmission, Transformation* Ragep, 2023-09-20 This volume is the outcome of two conferences held at the University of Oklahoma in 1992 and 1993 which dealt with issues of transmission and subsequent cultural transformations that occurred in the premodern histories of mathematics and science Some twenty contributors explore transmission from a variety of perspectives including the role of language and other facets of culture in the transmission process the interaction of popular and elite science in transmission successful and less than successful episodes of scientific appropriation and the role of institutions in this process The volume uses the theme of transmission as a way to focus debate on the perennial issue of the continuity and discontinuity of ideas in the history of sciences Canadian Mathematical Bulletin ,1972 *Journal for the History of Astronomy* ,1970 *Media and Monotheism* Joachim Schaper, 2019-07-22 Symbolising i e representing through the use of media is a more elementary more foundational activity than the self conscious use of the intellect Its exploration is central to this investigation of the transformation of the pre exilic Yahweh religion into the monotheism of the post exilic period That transformation was triggered by a new constellation of key media in the pre exilic and exilic periods writing images and money The central objective is to understand how their use contributed to a decisive increase in abstraction in representation and led to changes in the conceptualisation of divine presence and its representation that ultimately resulted in the transition from monolatry to monotheism In this study Joachim Schaper explores neglected areas of Judahite material culture and contributes to an in depth reconstruction of Judah s religious history in its most important epoch and thus of one of the key developments in the religious history of humanity Mathematical Reviews ,1971-07 *List of Accessions to the Library Science Museum* (Great Britain).
