## **Studies In Phenomenology:**

**Thematic Studies in Phenomenology and Pragmatism** Patrick L. Bourgeois, Sandra B. Rosenthal, 1983-01-01 The themes chosen for study in this volume are deeply embedded within the respective structures of phenomenology and pragmatism though often implicitly so Each of the six chapters begins with the phenomenological perspective and then proceeds to the pragmatic focus The intent of each chapter is both to provide increased clarity in understanding each of the two positions and to reveal the basic philosophic rapport between them Such a recognized rapport in turn adds to the insightful understanding of each position at times opening up new possibilities for the expansion or deepening of a particular position For once the fundamental rapport is uncovered the two different approaches can be found to cast mutually revealing lights on seemingly diverse but ultimately unifying interests The phenomenological philosophy of this study thematically focuses primarily on the existential phenomenology of Merleau Ponty and Heidegger The pragmatic framework incorporates the philosophies of the five major classical American pragmatists Charles S Peirce William James John Dewey G H Mead and C I Lewis

Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy Edmund Husserl, 1989-09-30 As is made plain in the critical apparatus and editorial matter appended to the original German publication of Husserl's Ideas II I this is a text with a history It underwent revision after revision spanning almost 20 years in one of the most fertile periods of the philosopher's life The book owes its form to the work of many hands and its unity is one that has been imposed on it Yet there is nothing here that cannot be traced back to Husserl himself Indeed the final clean copy for publication prepared by an assistant was completely reviewed by the master three times and emended by him in detail on each occasion Nevertheless in the end the work was in fact not submitted for publication and after Husserl's pen last touched the manuscript in 1928 it was set aside until posthumously edited and published by the Husserl Archives in 1952 The story of the composition of Ideas II begins with the pencil manuscript of 1912 This is the ultimate textual source for both Ideas II and Ideas III 2 It has been preserved as a folio of 84 sheets in very dense shorthand of the Gabelsberger system written mostly with a pencil It was composed by Husserl in one stroke immediately after the completion of I Edmund Husserl Ideen zu einer reinen Phänomenologie und phänomenologischen Philosophie Zweites Buch Phänomenologische Untersuchungen zur Konstitution Edited by Marly Biemel The Hague Martinus Nijhoff 1952 Husserliana IV

Studies in Phenomenology D. Sinha, 1969-07-31 The book is the result of my preoccupation with the phenomenological philosophy of Edmund Husserl during my years of post doctoral studies approximately since 1960 As the titles of the chapters may suggest I have dealt with a number of topics relating to Husserlian Phenomenology themes which are relatively independent but not disconnected For I have been prone to look upon this movement as presenting more an organic outlook of its own in spite of its diversity of phases than as offering certain answers to individual philosophical problems Accordingly my aim here has been to interpret the meaning and significance of this outlook in its logical epistemological and metaphysical aspects In writing these chapters

I have been aware of the fact that the phenomenological movement as such still represents some thing of a heterodoxy in the world of Anglo American philosophy to day Yet the points of contact between the two are not far fetched In treating the problems from the phenomenological point of view I have often taken into account the views of the empirical analytical school in general It should be clear that instead of confining myself to a bare exposition of the different aspects of Husserlian Phenomenology I have taken some freedom in interpreting its point of view

**Studies in Phenomenology and Psychology** Aron Gurwitsch,1966 The articles collected in this volume were written during a period of more than thirty years the first having been published in 1929 the last in 1961 They are arranged in a systematic not a chronological order starting from a few articles mainly concerned with psychological matters and then passing on to phenomenology in the proper sense

*Comparative Studies in Phenomenology* M. Sukale,2012-12-06 The essays which are collected in this book were written at various intervals during the last seven years The essay Heidegger and Dewey which is the last one to be printed in the book was actually the first one I wrote It was written as a seminar paper for John D Goheen s course on Dewey in the Spring of 1968 at Stanford University where I was a second year graduate student The paper went unchanged into my thesis Four Studies in Phenomenology and Pragmatism which I eventually submitted in 1971 and it is here reprinted with no alteration except for the title A first version of the two essays on Sartre was written in the Spring of 1969 during my first year of teaching at Princeton University Even tually I decided to break the essay into two parts A shortened version of Sartre and the Cartesian Ego was read at the Eastern Division Meeting of the American Philosophical Association in December 1973

**The Problem of Religious Experience** Olga Louchakova-Schwartz,2020-01-28 For a long time the philosophically difficult topic of religious experience has been on the sidelines of phenomenological research with a notable exception of Anthony Steinbock who focused on mysticism The book The Problem of Religious Experience Case Studies in Phenomenology with Reflections and Commentaries brings together preeminent as well as emerging voices in the field with fresh views on the topic Originating from dialogues of the Society for the Phenomenology of Religious Experience these two volumes cover a spectrum of phenomenological approaches with a thematization of the field in the form of case studies Contributions from theology comparative religion psychology and the philosophy of religion come together in the commentaries and meta narrative written by Olga Louchakova Schwartz the editor Volume I The Primeval Showing of Religious Experience examines religious experience with regard to its lived interiority in light of the problem of the ego cogito including the recent research on the embodiment of subjectivity and phenomenological materiality Volume I also sheds light on religious experience in regard for the problems of its constitution passive synthesis the world and otherness Volume II Doxastic Perspectives in the Phenomenology of Religious Experience addresses the phenomenology of revelation shows how different approaches treat the question of essence in religious experience i e what is it that makes religious experience religious and demonstrates how religious experience contributes to the psychological horizon of meaning The book identifies the growing edges in the

phenomenological research of religious experience and is useful for psychologists philosophers and theologians alike The two volumes offer an excellent interdisciplinary introduction to the phenomenon of religious experience The case studies presented in them are arranged under the central topics of self alterity revelation and psychological aspects of religious experience and provide outstanding examples of applied phenomenology Hans Rainer Sepp Charles University Prague and Central European Institute of Philosophy In the context of the return of religion this book offers both a timely and necessary contribution to confront the peculiarities of religious experience Providing readers with applied phenomenological descriptions in an interdisciplinary spirit these debates will prove stimulating for a resurgent field of research that is starting to refine its conceptual devices and methodological presuppositions University of Vienna

**The Oxford Handbook of Phenomenologies and Organization Studies** François-Xavier de Vaujany, Jeremy Aroles, Mar Pérezts, 2023 Phenomenologies are a major stream of philosophy Our aim with this handbook is to explore critically and reflexively the plurality of phenomenologies and their becoming in the context of Management and Organization Studies We detail in the introduction the genealogy of the phenomenological moment and make a distinction between four streams of phenomenologies phenomenology as a phenomenological moment post phenomenologies anti phenomenologies and non

phenomenologies Beyond many clichés about phenomenologies we argue that phenomenologies cultivate critical perspectives ontologies and even for some of them metaphysics that make them particularly interwoven with other philosophical traditions

We draw implications for Management and Organization Studies as a field

### **Phenomenology and Psychological**

**Research** Amedeo Giorgi, 1985 This book is both a theoretical justification of a phenomenological and human scientific approach to psychological research and a presentation of findings in the areas of cognitive clinical and social psychology The book is important because it is the most sustained statement to date about a phenomenological approach to psychological research along with original findings to compare with mainstream psychology in crucial areas of psychology cognitive clinical and social psychology Phenomenology and Psychological Research is further clarification of the phenomenological approach to psychological research along with examples of application in four different content areas learning and thinking both examples of alternative approaches to cognitive processes self deception clinical psychology and criminal victimization social psychology As such it gives the reader who is merely curious about the possibilities of phenomenological approaches a good opportunity to evaluate its fruitfulness whereas those who are already sympathetic to the approach will find a greater articulation of the theory behind the procedures Lastly the reader will find in this study an example of a descriptive and qualitative approach to psychological research that claims to meet both phenomenological and human scientific criteria It is one of the first books to make such a claim about psychological research
