Alexander Griffin, 2019-07-02 Academic architectural education started with the inauguration of the Académie d'Architecture on 3 December 1671 in France. It was the first institution to be devoted solely to the study of architecture and its school was the first dedicated to the explicit training of architectural students. The Académie was abolished in 1793 during the revolutionary turmoil that besieged France at the end of the eighteenth century, although the architectural educational tradition that arose from it was resurrected with the formation of the École des Beaux-Arts and prevails in the ideologies and activities of schools of architecture throughout the world today. This book traces the previously neglected history of the Académie's development and its enduring influence on subsequent architectural schools throughout the following centuries to the present day. Providing a valuable context for current discussions in architectural education, *The Rise of Academic Architectural Education* is a useful resource for students and researchers interested in the history and theory of art and architecture.

Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996 This bibliography cites those Canadian and foreign reference sources that describe Canadian people, institutions, organizations, publications, art, literature, languages, and history. It lists books of a general nature as well as works in the disciplines of history and the humanities. These large divisions are then broken down by subject, genre, type of document, and province or territory. Titles of national, provincial, territorial, or regional interest are included in every subject area when available. The contents of the book are indexed four ways: by name, title, French subject, and English subject. And to facilitate browsing, the major reference books, those dealing with more than one subject or a large geographical region, are also cross-referenced. Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages. Entries for unilingual works include a citation in the language of the publication and a bilingual annotation. The annotations are descriptive and provide information on the content, arrangements, and indexing of works, the availability of non-print formats, previous editions, and title changes, and related works. *Canadian Reference Sources* will be an invaluable reference tool for future scholars and researchers.

Willem Drost (1633-1659) Jonathan Bikker, Willem Drost, 2005-01-01 The book draws on extensive research to revise what has been known about Drost's life, his stylistically diverse oeuvre, and his influences. The artist's training and his relationship to Rembrandt and other artists in the Rembrandt circle are examined, as is his Venetian period and the relation of his style to that of German-born painter Johann Carl Loth. Drost emerges as one of Rembrandt's most talented imitators, and despite his very short career, an artist with a variety of faces. **BOOK JACKET** [ERDA Energy Research Abstracts](#) United States.
