Other major themes are Ireland's relations with Britain and continental Europe, the beginnings of Irish feudalism, and the impact of the Viking and Norman invaders. The expanded second edition has been fully updated to take into account the most recent research in the history of Ireland in the early middle ages, including Ireland's relations with the Later Roman Empire, advances and discoveries in archaeology, and Church Reform in the 11th and 12th centuries. A new opening chapter on early Irish primary sources introduces students to the key written sources that inform our picture of early medieval Ireland, including annals, genealogies, and laws. The social, political, religious, legal, and institutional background provides the context against which *Díbh Críon* describes Ireland's transformation from a tribal society to a feudal state.
