Ascough, 2011-06-30 Private associations organized around a common cult profession ethnic identity neighbourhood or family were common throughout the Greco Roman antiquity offering opportunities for sociability cultic activities mutual support and a context in which to display and recognize virtuous achievement This volume collects a representative selection of inscriptions from associations in Attica Central Greece Macedonia Thrace published with English translations brief explanatory notes commentaries and full indices This volume is essential for several areas of study ancient patterns of social organization the organization of diasporic communities in the ancient Mediterranean models for the structure of early Christian groups and forms of sociability status displays and the vocabularies of virtue

Paul's Declaration of Freedom from a Freed Slave's Perspective Robin G. Thompson, 2023-03-27 This project attempts to listen to voices that have seldom been heard While others have explored Paul's theology of Christian freedom they have not considered how Paul's declaration of freedom would have been received by those who most desired and valued freedom the slaves and freedpersons in the Galatian churches In this study Robin Thompson explores both Greek and Roman manumission considers how the ancient Mediterranean world conceived of freedom and then examines the freedom declared in Galatians from a freed slave's perspective She proposes that these freedpersons would likely have perceived this freedom to be not only spiritual freedom but at least in the Christian communities individual freedom as well

Localism and the Ancient Greek City-State Hans Beck, 2020-07-31 A Greek historian investigates the importance of local identity in the Mediterranean world in a rare genuinely original book Highly recommended Choice Much as our modern world is interconnected through global networks the ancient Greek city states

were a dynamic part of the wider Mediterranean landscape In *Localism and the Ancient Greek World* historian Hans Beck argues that local shifts in politics religion and culture had a pervasive influence in a world of fast paced change Citizens in these communities were deeply concerned with maintaining local identity commercial freedom distinct religious cults and much more Beyond these cultural identifiers there lay a deeper concept of the local that guided polis societies in their contact with a rapidly expanding world Drawing on a staggering range of materials including texts by both known and obscure writers numismatics pottery analysis and archeological records Beck develops fine grained case studies that illustrate the significance of the local experience *Localism and the Ancient Greek City State* builds bridges across disciplines and ideas within the humanities It highlights the importance of localism not only in the archaeology of the ancient Mediterranean but also in today s conversations about globalism networks and migration

Reinventing the Amphiareion at Oropos Alexandra Wilding, 2021-11-15 This book asks why politically powerful entities invested in the Amphiareion a sanctuary renowned for its precarity and dependency The answer lies in unravelling the intricacies of the shrine s epigraphical record and the stories about the communities and individuals responsible for creating it By explaining patterns in inscribed display against the backdrop of broader events and phenomena emerging within central Greece this book revisits the Amphiareion s narrative and emphasises its political implications for its neighbours This interpretation offers new perspectives on the sanctuary and exposes agents manipulation of it in the course of reinventing their self image in a changing Greek world

Shaping Regionality in Socio-Economic Systems: Late Hellenistic - Late Roman Ceramic Production, Circulation,

and Consumption in Boeotia, Central Greece (c. 150 BC–AD 700) Dean Peeters, 2023-02-23 This book sheds some necessary light on local economies from the late Hellenistic to the Late Roman period The concepts of regions and regionality are employed to explore the complexity of ancient economies and ceramic variability and change in Boeotia Central Greece largely on the basis of the survey data generated by the Boeotia Project *An Inventory of Archaic and Classical Poleis* Mogens Herman Hansen, Thomas Heine Nielsen, 2004-11-11 This is the first ever documented study of the 1 035 identifiable Greek city states poleis of the Archaic and Classical periods c 650 325 BC Previous studies of the Greek polis have focused on Athens and Sparta and the result has been a view of Greek society dominated by Sophokles Plato s and Demosthenes view of what the polis was This study includes descriptions of Athens and Sparta but its main purpose is to explore the history and organization of the thousand other city states The main part of the book is a regionally organized inventory of all identifiable poleis covering the Greek world from Spain to the Caucasus and from the Crimea to Libya This inventory is the work of 47 specialists and is divided into 46 chapters each covering a region Each chapter contains an account of the region a list of second order settlements and an alphabetically ordered description of the poleis This description covers such topics as polis status territory settlement pattern urban centre city walls and monumental architecture population military strength constitution alliance membership colonization coinage and Panhellenic victors The first part of the book is a description of the method and principles applied in the construction of the inventory and an analysis of some of the results to be obtained by a comparative study of the 1 035 poleis included in it The ancient Greek concept of polis is distinguished from the modern term city state which historians use to cover many other historic civilizations from ancient Sumeria to the West African cultures absorbed by the nineteenth century colonializing powers The focus of this project is what the Greeks themselves considered a polis to be *The Hero Cults of Sparta* Nicolette A. Pavlides, 2023-09-07 This book examines the hero cults of Sparta on the basis of the archaeological and literary sources Nicolette Pavlides explores the local idiosyncrasies of a pan Hellenic phenomenon which itself can help us understand the place and function of heroes in Greek religion Although it has long been noted that hero cult was especially popular in Sparta there is little known about the cults both in terms of material evidence and the historical context for their popularity The evidence from the cult of Helen and Menelaos at the Menelaion the worship of Agamemnon and Alexandra Cassandra the Dioskouroi and others who remain anonymous to us is viewed as a local phenomenon reflective of the developing communal and social consciousness of the polis What is more through an analysis of the typology of cults it is concluded that in Sparta the boundaries of the divine heroic mortal were fluid which allowed a great variation in the expression of cults The votive patterns topography and architectural evidence permit an analysis of the kinds of offerings to hero cults and an evaluation of the architecture that housed such cults Due to the material and spatial distribution of the votive deposits it is argued that Sparta had a large number of hero shrines scattered throughout the polis which attests to an enthusiastic and long lasting local votive practice at a popular level

Reconstructing Satyr Drama Andreas P. Antonopoulos, Menelaos M. Christopoulos, George W. M. Harrison, 2021-07-05

The origins of satyr drama and particularly the reliability of the account in Aristotle remains contested and several of this volume's contributions try to make sense of the early relationship of satyr drama to dithyramb and attempt to place satyr drama in the pre-Classical performance space and traditions. What is not contested is the relationship of satyr drama to tragedy as a required cap to the Attic trilogy. Here however how Aeschylus, Sophocles and Euripides to whom one complete play and the preponderance of the surviving fragments belong envisioned the relationship of satyr drama to tragedy in plot structure, setting, stage action and language is a complex subject tackled by several contributors. The playful satyr chorus and the drunken senility of Silenos have always suggested some links to comedy and later to Atellan farce and phlyax. Those links are best examined through language passages in later Greek and Roman writers and in art. The purpose of this volume is to probe as many themes and connections of satyr drama with other literary genres as well as other art forms, putting satyr drama on stage from the sixth century BC through the second century AD. The editors and contributors suggest solutions to some of the controversies but the volume shows as much that the field of study is vibrant and deserves fuller attention.
