Together at the Table Patricia Allen,2004

Everywhere you look people are more aware of what they eat and where their food comes from In a cafeteria in Los Angeles children make their lunchtime food choices at fresh fruit and salad bars stocked with local foods In a community garden in New York low income residents are producing organically grown fruits and vegetables for their own use and to sell at market In Madison Wisconsin shoppers select their food from a bounty of choices at a vibrant farmers market Together at the Table is about people throughout the United States who are building successful alternatives to the contemporary agrifood system and their prospects for the future At the heart of these efforts are the movements for sustainable agriculture and community food security Both movements seek to reconstruct the agrifood system the food production chain from the growing of crops to food production and distribution to become more ecologically sound economically viable and socially just Allen describes the ways in which people working in these movements view the world and how they see their place in challenging and reshaping the agrifood system She also shows how ideas and practices of sustainable agriculture and community food security have already woven their way into the dominant agrifood institutions Allen explores the possibilities this process may hold for improving social and environmental justice in the American agrifood system Together at the Table is an important reminder that much work still remains to be done Now that the ideas and priorities of alternative food movements have taken hold it is time for the next even more challenging step Alternative agrifood movements must acknowledge and address the deeper structural and cultural patterns that constrain the long term resolution of social and environmental problems in the agrifood system

affected the agricultural enterprise they look at the role of farmers organizations in policy formulation and take note of changes in farm patterns and policies that have had an impact on farm production off farm work and the welfare of farm families and rural communities *Rural Development Perspectives* ,1988-02 **Forsaken Harvest** Luis G.

Buttel,Olaf F. Larson,Gilbert W. Gillespie (Jr),1990-02-08 Published to commemorate the 50th anniversary of the Rural Sociological Society this monograph analyzes the nearly 90 years of rural sociological research on agriculture and provides a comprehensive overview of changing research focuses and theoretical approaches As the authors note at the outset there are a good number of continuities between early 20th century rural sociology and what is now called the sociology of agriculture There are also they note very substantial differences between contemporary sociology of agriculture scholarship and that which preceded it Their aim throughout is to convey both continuities and discontinuities in theory method and approach Intended primarily as a straightforward exposition of major scholarly themes the volume is designed to be useful to readers from a variety of theoretical persuasions The authors do however point to areas of weakness in theoretical or methodological approach that should be addressed in future research The volume is organized around the three major eras of rural sociological conceptualizations of agriculture The authors begin by examining the founding of U S rural sociology shortly after the turn of the century until the early 1950s demonstrating that during this initial era the study of agriculture was largely construed as one of the many elements necessary for understanding the social fabric of rural community life In the next section they explore the social psychological behaviorist tradition which held sway from the early 1950s through the early 1970s and which conceptualized farmers as actors responding to stimuli such as new technologies and educational opportunities The three chapters devoted to recent research in the emerging tradition of the new rural sociology address such topics as the political economy of agriculture the environment of agriculture and major theoretical trends in the sociology of agriculture In their concluding chapter the authors look toward the future of the sociology of agriculture and identify some potential problems as we move into the 1990s Research, Realpolitik, And Development In Korea Larry Burmeister,2019-07-11 This book explores the politics of Korean developmental state and commitment of state agents to rapid industrialization within
