Nuclear Science Abstracts, 1974-07 **Schizophrenia Bulletin**, 1977 The Model of Ramadan Diurnal Intermittent Fasting: Unraveling the Health Implications, volume III Moez Al-Islam Ezzat Faris, Faiza Kalam, Ahmed S. BaHammam, Meghit Boumediene Khaled, Hamdi Chtourou, Dana N. Abdelrahim, 2025-04-28. Intermittent fasting (IF) is rapidly gaining interest across scientific disciplines and also in the general community. The practice of IF is a safe and costless measure that offers health improvement and disease prevention in particular in the context of chronic metabolic diseases. One of the most commonly practiced models of IF at the global level is the religious form of obligatory intermittent fasting observed annually in the month of Ramadan by about 1.5 billion Muslim people. A growing body of literature accumulated during the last two decades provides evidence that observing this one-month religious fasting, lasting between 12-17 hours a day depending on the location and season, provides metabolic and physiological benefits. The many health benefits of Ramadan Intermittent Fasting (RIF) include improvements in body weight, body composition, reducing complications of metabolic syndrome, improving lipid profile, and other cardiometabolic risk factors. Further, RIF helps improving glucose homeostasis, ameliorating inflammatory and oxidative stress markers, and modulating gene expression of various components of the anti-inflammatory and antioxidant defense systems. Despite being the most extensively studied form of IF, many gaps remain in our understanding of the versatile effects of RIF in healthy people, including athletes. Further, it is unclear how the observance of RIF affects patients with illnesses such as diabetes, cardiovascular disease, and cancer. More information is needed on the effects of RIF on different body systems and the possible epigenetic changes produced by this religious practice. A better understanding of RIF will help to optimize the practice of RIF, maximize its health benefits, and

guide healthcare providers to better advise their chronically ill patients on matters related to Ramadan fasting **Principles and Practice of Clinical Research** John I.
