Disaster and the Millennium Michael Barkun, 1986-08-01 The world of millenarian movements holds a special fascination The idea of transforming an existing imperfect society overnight into a perfect utopia has a powerful appeal and over and over in widely scattered areas and epochs groups have followed the call of a messiah figure to usher in a beautiful new world What causes these movements to arise Do they conform to any common patterns In this absorbing study of unconventional human behavior Michael Barkun develops a broad based analysis that focuses on millenarian movements as consequences of local disasters. He presents many examples of millenarian groups in action in both modern and preindustrial societies and reviews existing theories and explanations After describing the characteristics of the disaster situations that produce them he explores the psychological effects of disasters discusses the conversion process and grapples with the question whether such movements are rational He concludes with a detailed examination of millenarianism in the modern world The longing for utopia is a durable human quality Both general readers and scholars interested in problems of change violence and social upheaval will find Disaster and the Millennium wide ranging and provocative Dimensions of Constitutional Democracy Anupama Roy, Michael Becker, 2020-06-01 This book examines a selection of themes that have become salient in contemporary debates on constitutional democracies It focuses in particular on the experiences of India and Germany as examples of post war and post colonial constitutional democracies whose trajectories illustrate democratic transitions and transformative constitutionalism While transformative constitutionalism has come to be associated specifically with the post apartheid experience in South Africa this book uses the transformative as an analytical framework to transcend the dichotomy of west and east and explore how temporally coincident constitutions have sought to install constitutional democracies by breaking with the past While the constitution making processes in the two countries were specific to their political contexts the constitutional promises and futures converged In this context the book explores the themes of Constitutionalism Nationalism Secularism Sovereignty and Rule of Law Freedoms and Rights to investigate how the contestations over democratic transitions and democratic futures have unfolded in the two democracies It offers readers valuable insights into how the normative frameworks of constitutional democracy take concrete form at specific sites of democratic and constitutional imagination in Dalit and Islamic writings as well as the relationship between state and religion in the writings of public intellectuals political and legal philosophers The book also focuses on specific sites of contestation in democracies including the relationship between sovereignty and citizenship in post colonial India free speech and sedition in liberal democracies questions of land rights in connection with economic and political changes in contemporary contexts and the rights of indigenous communities with regard to international conventions and domestic law Given its scope it will be of interest to students and scholars of political theory political philosophy comparative constitutionalism law and human rights
