Chimni articulates an integrated Marxist approach to international law IMAIL combining the insights of Marxism socialist feminism and postcolonial theory The book uses this approach to systematically and critically examine the most influential contemporary theories of international law including new feminist realist and policy oriented approaches In doing so it discusses a range of themes relating to the history structure and process of international law The book also considers crucial world order issues and problems that the international legal process has to contend with including the welfare of weak groups and nations the ecological crisis and the role of human rights This extensively revised second edition provides an invaluable in depth and updated review of the key literature and scholarship within this field of study It will be of particular interest to students and scholars of international law international relations international politics and global studies

China, the United Nations and World Order Samuel S. Kim, 2015-03-08 China's role in the United Nations has been a significant one. Yet Samuel Kim contends as far as the literature on Chinese foreign policy is concerned the People's Republic of China still remains outside the heuristic framework of the global community. In a comprehensive macro analysis of Chinese global politics Professor Kim probes China's image and strategy of world order as manifested through its behavior in the UN. The author draws upon a wide range of previously untapped primary sources including China's policy pronouncements and voting record and over a hundred personal interviews with UN delegates and international civil servants. He finds that Chinese participation has made the United Nations not only more representative but also more relevant as the global political institution responding to the challenge of establishing a more humane and just world order. Toward A Just World Order Richard Falk, 2019-03-22 This text is designed to provide students with a solid theoretical and methodological base for understanding how the present international system works, how that system is likely to evolve given current world trends, and what realistically can be done to alleviate the most serious global problems. Part 1 develops a world order perspective by examining

The Time is Now Edward Vose Gulick, 1999-01-01 Although the Cold War may be over, the new weaponry of mass destruction remains in many different forms and in many different hands. If unchanged, argues Edward Gulick, the present international system with its older framework and newer capabilities virtually guarantees global desolation and nuclear winter. Our chances of survival hinge on substantial changes in the system itself. Gulick looks at major events of the twentieth century and draws from his thirty-year experience as professor and scholar of history to propose a series of common sense alterations to the structure of our present world system, including major acts of global statesmanship leading to minimal but sufficient world governance. Scholars of world history, international relations, and global issues will be especially interested in this book.

Futures of the Study of Culture Doris Bachmann-Medick, Jens Kugele, Ansgar Nünning, 2020-08-10 How can we approach possible but unknown futures of the study of culture? This volume explores this question in the context of a changing global world. The contributions in this volume discuss the necessity of significant shifts in our conceptual and epistemological frameworks. Taking into account changing institutional research settings, the authors develop pathways to future cultural research addressing the crucial concerns of the cultural and social worlds themselves. The contributions thereby utilize contact zones within a wide range of disciplines such as cultural anthropology, sociology, cultural history, literary studies, the history of science, and bioethics, as well as the environmental and medical humanities. Examining emerging inter- and transdisciplinary points of reference, the volume invites

scholars in the humanities and social sciences to take part in a conversation about theories methods and practices for the future study of culture

The National Interest and the Human Interest Robert C. Johansen, 2014-07-14 In an effort to determine the extent to which the United States contributes to the creation of a preferred system of world order Robert Johansen considers the country's performance against a framework of four major global values peace economic wellbeing social justice and ecological balance Originally published in 1980 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Working with Time in Qualitative Research Keri Facer, Johan Siebers, Bradon Smith, 2021-12-30 This collection brings together researchers and scholars from across the Arts Humanities and Social Sciences who are actively exploring the many different ways in which time might be understood imagined and used in qualitative research Taken together the contributions begin to trace the contours of what it might mean to work reflexively with time as an epistemologically constitutive element of research design The book explores how the choice to work with pasts or futures with speed or delay with clocks or the time of the body with utopias or failed futures among other things reframe how social and cultural phenomena are perceived and brought into existence in qualitative research Drawing on fields as disparate as

futures studies and history literary analysis and urban design utopian studies and science and technology studies this collection serves as a resource for both new and experienced researchers in the humanities and social sciences It is a critically important resource for beginning to explore the wide repertoire of theoretical and methodological tools for working with time in the research process The book also draws attention to the way that institutional research timescapes from university workload patterns to funding processes and project timescales themselves shape how and what it is possible to know in and about the world It concludes with a rousing manifesto for scholars and researchers proposing 10 key attributes of temporally reflexive research
