Ellerman, 2025-08-19 During a time of widespread intraspecific aggression and barbaric captivity throughout the planet this study of the ethics of survival asks the burning question At the extremes of experience when captives are struggling to survive is there a line at which the moral judgment of survival behavior ceases Stated differently Are there times in the lives of humans when the valiant attempt to maintain moral scruples clashes with the way the world is moments when moral pretension moral aspiration and the expectation of moral agency are absurd Putting the burning question under strain Carl P Ellerman offers testimony from the confessional publications of survivors who were subjected to life threatening barbaric experiences He also critically scrutinizes the competing ethical perspectives of Hume Kant Nietzsche and the U S Department of Defense Military Code of Conduct to show how the ethics of survival has been handled philosophically and militarily Empirical evidence from Evolutionary Biology Primatology and the Neurosciences is interwoven to advance a biological realism in the ethics of survival Readers are also invited to undertake an honest self examination using active imagination to answer unsparing questions as if each reader were wearing the shoes of a captive who abjures the fictions of

Debating Turkey in Europe Caner Tekin, 2019-12-16 In contemporary history a much debated issue has been whether European nations have a common identity and what relevance the European Union has for a shared definition of Europeanness The present book examines the link between historical conceptions of Europe and the contestations over Turkey's compatibility with the European Union during the 2000s

Leaders Eat Last Simon Sinek, 2014-01-07 The New York Times bestseller by the acclaimed bestselling author of *Start With Why* and *Together is Better Now* with an expanded chapter and appendix on leading millennials based on Simon Sinek's viral video *Millennials in the workplace* 150 million views Imagine a world where almost everyone wakes up inspired to go to work feels trusted and valued during the day then returns home feeling fulfilled This is not a crazy idealized notion Today in many successful organizations great leaders create environments in which people naturally work together to do remarkable things In his work with organizations around the world Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other Other teams no matter what incentives are offered are doomed to infighting fragmentation and failure Why The answer became clear during a conversation with a Marine Corps general Officers eat last he said Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line What's symbolic in the chow hall is deadly serious on the battlefield Great leaders sacrifice their own comfort even their own survival for the good of those in their care Too many workplaces are driven by cynicism paranoia and self interest But the best ones foster trust and cooperation because their leaders build what Sinek calls a Circle of Safety that separates the security inside the team from the challenges outside Sinek illustrates his ideas with fascinating true stories that range from the military to big business from government to investment banking

The Return of Nature John Bellamy Foster, 2021-06-01 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster's *Marx's Ecology Materialism and Nature* introduced a new understanding of Karl Marx's revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with *The Return of Nature Socialism and Ecology* Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today's unprecedented planetary emergencies *The Return of Nature* begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for

is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs Life History Evolution Steven C. Hertler,Aurelio José Figueredo,Mateo Peñaherrera-Aguirre,Heitor B. F. Fernandes,Michael A. Woodley of Menie,2018-07-04 The social sciences share a mission to shed light on human nature and society However there is no widely accepted meta theory no foundation from which variables can be linked causally sequenced or ultimately explained This book advances life history evolution as the missing meta theory for the social sciences Originally a biological theory for the variation between species research on life history evolution now encompasses psychological and sociological variation within the human species that has long been the stock and trade of social scientific study The eighteen chapters of this book review six disciplines eighteen authors and eighty two volumes published between 1734 and 2015 re reading the texts in the light of life history evolution
